

Annual Report 2016

BASIS OF PRESENTATION AND SUMMARY OF ACCOUNTING POLICIES

The consolidated financial statements of the Company, which are the basis for data presented in this report, have been prepared in accordance with International Financial Reporting Standards (IFRS) unless otherwise noted and are presented in millions of Canadian dollars unless otherwise indicated.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This report may contain forward-looking statements. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” and other similar expressions or negative versions thereof. These statements may include, without limitation, statements about the Company's operations, business, financial condition, expected financial performance (including revenues, earnings or growth rates), ongoing business strategies or prospects, and possible future actions by the Company, including statements made with respect to the expected benefits of acquisitions and divestitures. Forward-looking statements are based on expectations, forecasts, predictions, projections and conclusions about future events that were current at the time of the statements and are inherently subject to, among other things, risks, uncertainties and assumptions about the Company, economic factors and the financial services industry generally, including the insurance and mutual fund industries. They are not guarantees of future performance, and the reader is cautioned that actual events and results could differ materially from those expressed or implied by forward-looking statements. Material factors and assumptions that were applied in formulating the forward-looking information contained herein include the assumption that the business and economic conditions affecting the Company's operations will continue substantially in their current state, including, without limitation, with respect to customer behaviour, the Company's reputation, market prices for products provided, sales levels, premium income, fee income, expense levels, mortality experience, morbidity experience, policy lapse rates, reinsurance arrangements, liquidity requirements, capital requirements, credit ratings, taxes, inflation, interest and foreign exchange rates, investment values, hedging activities, global equity and capital markets, business competition and other general economic, political and market factors in North America and internationally. Many of these assumptions are based on factors and events that are not within the control of the Company and there is no assurance that they will prove to be correct. Other important factors and assumptions that could cause actual results to differ materially from those contained in forward-looking statements include customer responses to new products, impairments of goodwill and other intangible assets, the Company's ability to execute strategic plans and changes to strategic plans, technological changes, breaches or failure of information systems and security (including cyber attacks), payments required under investment products, changes in local and international laws and regulations, changes in accounting policies and the effect of applying future accounting policy changes, unexpected judicial or regulatory proceedings, catastrophic events, continuity and availability of personnel and third party service providers, the Company's ability to complete strategic transactions and integrate acquisitions and unplanned material changes to the Company's facilities, customer and employee relations or credit arrangements. The reader is cautioned that the foregoing list of assumptions and factors is not exhaustive, and there may be other factors, including factors set out herein under “Financial Instruments Risk Management”. The reader is also cautioned to consider these and other factors, uncertainties and potential events carefully and not to place undue reliance on forward-looking statements. Other than as specifically required by applicable law, the Company does not intend to update any forward-looking statements whether as a result of new information, future events or otherwise.

CAUTIONARY NOTE REGARDING NON-IFRS FINANCIAL MEASURES

This report contains some non-IFRS financial measures. Terms by which non-IFRS financial measures are identified include, but are not limited to, “operating earnings”, “constant currency basis”, “premiums and deposits”, “sales”, “assets under management”, “assets under administration” and other similar expressions. Non-IFRS financial measures are used to provide management and investors with additional measures of performance to help assess results where no comparable IFRS measure exists. However, non-IFRS financial measures do not have standard meanings prescribed by IFRS and are not directly comparable to similar measures used by other companies. Please refer to the appropriate reconciliations of these non-IFRS financial measures to measures prescribed by IFRS.

PROFILE

Founded in 1847, Canada Life was Canada's first domestic life insurance company, and in 2017 we will celebrate our 170th anniversary. We provide insurance and wealth management products and services in Canada, the United Kingdom, Isle of Man and Germany, and in Ireland through Irish Life. Canada Life is a subsidiary of The Great-West Life Assurance Company.

In Canada, Canada Life offers insurance and wealth management products and services for individuals, families and business owners from coast to coast. Our products include investments, savings and retirement income, annuities, life, disability and critical illness insurance. They are distributed through independent advisors associated with managing general agencies, as well as national accounts including Investors Group. Group payout products issued by Canada Life are distributed under the Great-West Life brand.

Canada Life is also a leading provider of creditor insurance for mortgages, loans, credit cards and lines of credit, through leading financial institutions and other lending institutions.

Together, Canada Life, Great-West Life and London Life serve the financial security needs of more than 13 million people across Canada.

In Europe, Canada Life's operations date back to 1903. We provide individuals and their families with protection and wealth management products including payout annuities, investment products, group and individual insurance, pension products, critical illness and disability insurance. We provide asset management services through Canada Life in the U.K., and through Irish Life Investment Managers and Setanta Asset Management in Ireland.

As a leading provider of traditional mortality, structured and longevity reinsurance solutions for life insurers in the U.S. and in Europe, Canada Life operates through branches and subsidiaries in the United States, Barbados and Ireland.

Canada Life, Great-West Life and London Life are members of the Power Financial Corporation group of companies.

For more information, including current credit ratings, visit www.canadalife.com.

Delivering on our Commitments – Today and Tomorrow

Delivering on our commitments is at the core of our purpose. We do so through an uncompromising focus on our customers, disciplined management of our resources and ongoing strategic investment in our people, capabilities and communities.

Financial strength and stability underpin the long-term commitments our companies have made to our customers for almost 170 years – and continue to make each and every day. Key areas of focus in 2016 included investment in digital capabilities to ensure our products and services remain relevant and accessible; expense reduction initiatives, and disciplined evaluation and integration of acquisitions.

This year's report highlights our achievements as well as the many strategic initiatives underway to capitalize on opportunities in a fast changing world. As we evolve, the common denominator in all that we do will be striving to find new and better ways to respond to and anticipate the changing needs of our customers.

Core Strengths

In Canada, Canada Life, Great-West Life and London Life together are focused on improving the financial, physical and mental well-being of Canadians. Our products and services touch the lives of more than 13 million people – approximately one in three Canadians.

To remain engaged with generations of customers to come, we continually strive to meet their evolving needs and preferences.

In November, we announced the alignment of the Canadian operations of Canada Life, Great-West Life and London Life around two core business units focused on individual and group customers, supported by a new strategic customer marketing function. The productivity gains and cost savings associated with these changes, balanced with reinvestment in customer-centred innovations and service offerings, will support earnings growth and our goal of creating a more holistic customer experience.

On the regulatory front, protecting customers' interests and harmonizing standards was an increasing focus around the globe. Our experience in global markets allows our companies to proactively engage with policymakers to help shape the emerging regulatory environment. We are equally engaged internally to evolve our products and services and the delivery of advice to ensure we meet the changing needs and expectations of consumers.

In Europe, we've responded to regulatory capital and legislative changes to create new growth opportunities. In the U.K., we are driving growth in response to legislative changes that introduced greater flexibility for individuals to access their pension savings. In Germany, our fastest growing business in Europe, the Solvency II capital regime has created a unique growth opportunity for our capital-efficient, unit-linked products. Solvency II is also creating new opportunities for our reinsurance business.

Anticipating and Responding in a Changing World

The intersection of changing demographics, technology and globalization presents challenges and opportunities for companies to remain competitive and build strong and lasting customer relationships.

Demographic shifts fundamentally impact the mix and type of products and services we provide. Older consumers are moving from asset accumulation to retirement products and are expected to participate in the largest intergenerational wealth transfer in history. Younger consumers are challenging financial services institutions to meet their unique needs and expectations. Immigration on a global scale is

Jeffrey Orr
Chair of the Board

Paul Mahon
President and
Chief Executive Officer

creating multi-cultural societies. Successful companies will adapt to meet the dynamic needs and preferences of their diverse customer segments.

New technology is affording customers of all ages and walks of life greater choice in how, when and where they interact with providers of goods and services. Our business is no different, with evolving financial technologies now a part of our competitive landscape.

Consumers have more options than ever to seek information and advice, make decisions and purchase products through their preferred channel. We recognize the opportunities and are investing in innovation to broaden our product shelf and ways of interacting with our customers.

Helping our Canadian customers transition seamlessly into retirement prompted creation of the HelloLife retirement income program. The customer and the advisor work together, allowing the customer to be involved every step of the way. This unique approach brings together the customer's aspirations and lifestyle with the advisor's financial planning advice to help generate a realistic plan that can provide predictable income for life along with opportunities for growth.

In Ireland, Irish Life's health insurance business – Irish Life Health – enables customers to acquire products through digital or advisory channels. Irish Life Health was created in 2016 through transactions to acquire Aviva Health Insurance and assume control of GloHealth Financial Services. This new business leverages the creative digital platform of GloHealth with the traditional base of Aviva.

A new approach in the Irish market, Irish Life's OnePlan Protection provides an innovative, affordable combination of life insurance protection, income replacement and specified illness coverage in a single policy. OnePlan combines this coverage, enabling young families to get financial security protection through one policy customized to their needs and budget.

People and Communities

Corporate social responsibility continues to be a cornerstone of our companies. We have long held responsible and ethical management as an intrinsic value, essential to long-term profitability and value creation for our stakeholders. Our actions focus on making a positive contribution in our communities and building a more sustainable future for generations to come.

Stronger Communities Together is our approach to corporate citizenship in Canada. It's our lens for addressing issues at a national level, while responding to many regional and local concerns. In 2016, together with Great-West Life and London Life, we supported over 900 initiatives representing \$12.4 million in contributions. Many of these efforts begin with our people, who share their time, resources and expertise to improve the lives of those around them, and we support and encourage those efforts.

In Ireland, Irish Life's partnership with Healthy Ireland, the Health Services Executive and the National Office for Suicide Prevention supports the Healthy Club Project sponsored by the Gaelic Athletic Association, Ireland's leading amateur sporting and cultural organization. Irish Life's three-year €1 million investment in this flagship community initiative will help enhance the health and well-being of participants and their communities.

In the U.K., Canada Life has a strong partnership with Mount Grace, a school nearby its head office in Potters Bar. Employees dedicate many hours a year to helping students of Mount Grace with learning at school and preparing for the challenges of university and work life.

Board of Directors

Canada Life believes good corporate governance is essential to consistently strong long-term performance and positive outcomes for customers, policyholders and shareholders.

At our 2016 annual meeting, it was announced that long-serving Director Michel Plessis-Bélair would retire. Mr. Plessis-Bélair had been a member of the Board since 2003 and was a member of the Audit, Executive and Investment Committees. We would like to thank him for his valuable contribution to the affairs of the Company; and in particular, for his instrumental support over decades of regulatory and accounting changes.

At the 2016 annual meeting, Gary Doer and Rima Qureshi were elected to the Board of Directors. Mr. Doer most recently served as Canada's Ambassador to the United States, and prior to that as the Premier of Manitoba for more than a decade. Ms. Qureshi is President, North America at Ericsson, an international technology software and services company.

Thank You

Delivering on our commitments to stakeholders is at our core, and with our values, guides both our short and long-term planning.

We thank our customers, employees and advisors for your continued support. We remain well positioned to create long-term value for all our stakeholders in 2017 and beyond.

Total equity	\$ 10,784	\$ 11,084	(3)%

⁽¹⁾ In addition to premiums and deposits in the financial statements, the Company includes deposits on proprietary mutual funds and institutional accounts to calculate total premiums and deposits (a non-IFRS financial measure). This measure provides useful information as it is an indicator of top line growth.

⁽²⁾ Paid or credited to policyholders includes the impact of changes in fair values of assets supporting insurance and investment contract liabilities.

⁽³⁾ Total assets under management (a non-IFRS financial measure) provides an indicator of the size and volume of the overall business of the Company. Services provided in respect of assets under management include the selection of investments, the provision of investment advice and discretionary portfolio management on behalf of clients. This includes internally and externally managed funds where the Company has oversight over the investment policies.

⁽⁴⁾ Other assets under administration (a non-IFRS financial measure) include assets where the Company only provides administration services for which the Company earns fee and other income. These assets are beneficially owned by clients and the Company does not direct the investing activities. Services provided relating to assets under administration include recordkeeping, safekeeping, collecting investment income, settling of transactions or other administrative services. Administrative services are an important aspect of the overall business of the Company and should be considered when comparing volumes, size and trends.

FINANCIAL REPORTING RESPONSIBILITY

The consolidated financial statements are the responsibility of management and are prepared in accordance with International Financial Reporting Standards (IFRS), including the accounting requirements of the Office of the Superintendent of Financial Institutions Canada. The financial information contained elsewhere in the annual report is consistent with that in the consolidated financial statements. The consolidated financial statements necessarily include amounts that are based on management's best estimates. These estimates are based on careful judgments and have been properly reflected in the consolidated financial statements. In the opinion of management, the accounting practices utilized are appropriate in the circumstances and the consolidated financial statements present fairly, in all material respects, the financial position of the Company and its segregated funds and the results of its operations and its cash flows and the changes in assets of its segregated funds in accordance with IFRS, including the requirements of the Office of the Superintendent of Financial Institutions Canada.

In carrying out its responsibilities, management maintains appropriate internal control over financial reporting designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with IFRS, including the requirements of the Office of the Superintendent of Financial Institutions Canada.

The consolidated financial statements were approved by the Board of Directors, which has oversight responsibilities with respect to financial reporting. The Board of Directors carries out this responsibility principally through the Audit Committee, which comprises non-management directors. The Audit Committee is charged with, among other things, the responsibility to:

- Review the interim and annual consolidated financial statements and report thereon to the Board of Directors.
- Review internal control procedures.
- Review the independence of the external auditors and the terms of their engagement and recommend the appointment and compensation of the external auditors to the Board of Directors.
- Review other audit, accounting and financial reporting matters as required.

In carrying out the above responsibilities, this Committee meets regularly with management, and with both the Company's external and internal auditors to review their respective audit plans and to review their audit findings. The Committee is readily accessible to external and internal auditors and to the Appointed Actuary.

The Board of Directors of the Company, pursuant to the Insurance Companies Act (Canada), appoints an Actuary who is a Fellow of the Canadian Institute of Actuaries. The Actuary:

- Ensures that the assumptions and methods used in the valuation of policy liabilities are in accordance with accepted actuarial practice, applicable legislation and associated regulations and directives.
- Provides an opinion regarding the appropriateness of the policy liabilities at the balance sheet date to meet all policyholder obligations. Examination of supporting data for accuracy and completeness and analysis of assets for their ability to support the policy liabilities are important elements of the work required to form this opinion.
- Annually analyzes the financial condition of the Company and prepares a report for the Board of Directors. The analysis covers a five year period, and tests the projected capital adequacy of the Company, under adverse economic and business conditions.

Deloitte LLP Chartered Professional Accountants, as the Company's external auditors, have audited the consolidated financial statements. The Independent Auditor's Report to the Policyholders and Shareholder is presented following the consolidated financial statements. Their opinion is based upon an examination conducted in accordance with Canadian generally accepted auditing standards, performing such tests and other procedures as they consider necessary in order to obtain reasonable assurance that the consolidated financial statements present fairly, in all material respects, the financial position of the Company and its segregated funds and the results of its operations and its cash flows and the changes in assets of its segregated funds in accordance with IFRS.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(in Canadian \$ millions except per share amounts)

1. Corporate Information

The Canada Life Assurance Company (Canada Life or the Company) is a company incorporated and domiciled in Canada. The registered address of the Company is 330 University Avenue, Toronto, Ontario, Canada, M5G 1R8. Canada Life is a wholly-owned subsidiary of Canada Life Financial Corporation (CLFC), whose indirect parent is Great-West Lifeco Inc. (Lifeco). Lifeco is a member of the Power Corporation of Canada group of companies and its direct parent is Power Financial Corporation (Power Financial).

Canada Life is a financial services company with interests in the life insurance, health insurance, retirement savings, investment management and reinsurance businesses, primarily in Canada, Europe and the United States, through its wholly-owned subsidiary The Canada Life Group (U.K.) Limited (CLG (U.K.)), Canada Life Limited (CLL) and Irish Life Group Limited (Irish Life).

The consolidated financial statements (financial statements) of the Company as at and for the year ended December 31, 2016 were approved by the Board of Directors on February 9, 2017.

2. Basis of Presentation and Summary of Accounting Policies

The financial statements of the Company have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Consistent accounting policies were applied in the preparation of the consolidated financial statements of the subsidiaries of the Company.

The Company adopted the narrow scope amendments to IFRS for IFRS 11 *Joint Arrangements*, IAS 16 *Property, Plant and Equipment*, IAS 38 *Intangible Assets*, IAS 1 *Presentation of Financial Statements*, IFRS 10 *Consolidated Financial Statements*, IFRS 12 *Disclosure of Interests in Other Entities*, IAS 28 *Investments in Associates and Joint Ventures* and *Annual Improvements 2012 - 2014 Cycle* effective January 1, 2016. The adoption of these narrow scope amendments did not have a significant impact on the Company's financial statements.

Basis of Consolidation

The consolidated financial statements of the Company were prepared as at and for the year ended December 31, 2016 with comparative information for December 31, 2015. Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Company obtains control, and continue to be consolidated until the date that such control ceases. The Company has control when it has the power to direct the relevant activities, has significant exposure to variable returns from these activities and has the ability to use its power to affect the variable returns. All intercompany balances, transactions, income and expenses and profits or losses, including dividends resulting from intercompany transactions, are eliminated on consolidation.

Use of Significant Judgments, Estimates and Assumptions

In preparation of these financial statements, management is required to make significant judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, net earnings and related disclosures. Although some uncertainty is inherent in these judgments and estimates, management believes that the amounts recorded are reasonable. Key sources of estimation uncertainty and areas where significant judgments have been made are listed below and discussed throughout the notes to these financial statements including:

- Management uses independent qualified appraisal services to determine the fair value of investment properties, which utilize judgments and estimates. These appraisals are adjusted by applying management judgments and estimates for material changes in property cash flows, capital expenditures or general market conditions (note 5).

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

- In the determination of the fair value of financial instruments, the Company's management exercises judgment in the determination of fair value inputs, particularly those items categorized within level 3 of the fair value hierarchy (note 8).
- Cash generating unit groupings for goodwill and indefinite life intangible assets have been determined by management as the lowest level that the assets are monitored for internal reporting purposes, which requires management judgment in the determination of the lowest level of monitoring (note 9).
- Management evaluates the synergies and future benefit for initial recognition and measurement of goodwill and intangible assets as well as testing the recoverable amounts. The determination of the carrying value and recoverable amounts of the cash generating unit groupings for goodwill and intangible assets relies upon the determination of fair value or value-in-use using valuation methodologies (note 9).
- Judgments are used by management in determining whether deferred acquisition costs and deferred income reserves can be recognized on the Consolidated Balance Sheets. Deferred acquisition costs are recognized if management determines the costs meet the definition of an asset and are incremental and related to the issuance of the investment contract. Deferred income reserves are amortized on a straight-line basis over the term of the policy (notes 11 and 17).
- Management uses judgment to evaluate the classification of insurance and reinsurance contracts to determine whether these arrangements should be accounted for as insurance, investment or service contracts.
- The actuarial assumptions, such as interest rates, inflation, policyholder behaviour, mortality and morbidity of policyholders, used in the valuation of insurance and certain investment contract liabilities under the Canadian Asset Liability Method require significant judgment and estimation (note 12).
- The actuarial assumptions used in determining the expense and benefit obligations for the Company's defined benefit pension plans and other post-employment benefits requires significant judgment and estimation. Management reviews previous experience of its plan members and market conditions including interest rates and inflation rates in evaluating the assumptions used in determining the expense for the current year (note 23).
- The Company operates within various tax jurisdictions where significant management judgments and estimates are required when interpreting the relevant tax laws, regulations and legislation in the determination of the Company's tax provisions and the carrying amounts of its tax assets and liabilities (note 26).
- Management assesses the recoverability of the deferred income tax asset carrying values based on future years' taxable income projections and believes the carrying values of the deferred income tax assets as of December 31, 2016 are recoverable (note 26).
- Legal and other provisions are recognized resulting from a past event which, in the judgment of management, has resulted in a probable outflow of economic resources which would be passed to a third-party to settle the obligation. Management uses judgment to evaluate the possible outcomes and risks in determining the best estimate of the provision at the balance sheet date (note 29).
- The operating segments of the Company, which are the segments reviewed by the Company's Chief Executive Officer to assess performance and allocate resources within the Company. Management applies judgment in the aggregation of the business units into the Company's operating segments (note 31).
- The Company consolidates all subsidiaries and entities which management determines that the Company controls. Control is evaluated on the ability of the Company to direct the activities of the subsidiary or entity to derive variable returns and management uses judgment in determining whether control exists. Judgment is exercised in the evaluation of the variable returns and in determining the extent to which the Company has the ability to exercise its power to generate variable returns.
- Management uses judgments, such as the determination of the risks and benefits associated with the transaction that are used in determining whether the Company retains the primary obligation with a client in sub-advisor arrangements. Where the Company retains the risks and benefits, revenue and expenses are recorded on a gross basis.

2. *Basis of Presentation and Summary of Accounting Policies (cont'd)*

- Within the Consolidated Statements of Cash Flows, purchases and sales of portfolio investments are recorded within investment activities due to management's judgment that these investing activities are long-term in nature.
- The results of the Company reflect management's judgments regarding the impact of prevailing global credit, equity and foreign exchange market conditions. The provision for future credit losses within the Company's insurance contract liabilities relies upon investment credit ratings. The Company's practice is to use third-party independent credit ratings where available. Management judgment is required when setting credit ratings for instruments that do not have a third-party rating.

The significant accounting policies are as follows:

(a) Portfolio Investments

Portfolio investments include bonds, mortgage loans, stocks and investment properties. Portfolio investments are classified as fair value through profit or loss, available-for-sale, held-to-maturity, loans and receivables or as non-financial instruments based on management's intention relating to the purpose and nature of the instrument or characteristics of the investment. The Company has not classified any investments as held-to-maturity.

Investments in bonds and stocks normally actively traded on a public market or where fair value can be reliably measured are either designated or classified as fair value through profit or loss or classified as available-for-sale on a trade date basis. A financial asset is designated as fair value through profit or loss on initial recognition if it eliminates or significantly reduces an accounting mismatch. Changes in the fair value of financial assets designated as fair value through profit or loss are generally offset by changes in insurance contract liabilities, since the measurement of insurance contract liabilities is determined with reference to the assets supporting the liabilities. A financial asset is classified as fair value through profit or loss on initial recognition if it is part of a portfolio that is actively traded for the purpose of earning investment income. Fair value through profit or loss investments are recognized at fair value on the Consolidated Balance Sheets with realized and unrealized gains and losses reported in the Consolidated Statements of Earnings. Available-for-sale investments are recognized at fair value on the Consolidated Balance Sheets with unrealized gains and losses recorded in other comprehensive income. Realized gains and losses on available-for-sale investments are reclassified from other comprehensive income and recorded in the Consolidated Statements of Earnings when the investment is sold. Interest income earned on both fair value through profit or loss and available-for-sale bonds is recorded as net investment income in the Consolidated Statements of Earnings.

Investments in stocks where a fair value cannot be measured reliably are classified as available-for-sale and carried at cost. Investments in stocks for which the Company exerts significant influence over but does not control are accounted for using the equity method of accounting. Investments in stocks over which the Company exerts significant influence but does not control include the Company's investment in Allianz Ireland, an unlisted general insurance company operating in Ireland.

Investments in mortgages and bonds not normally actively traded on a public market are classified as loans and receivables and are carried at amortized cost net of any allowance for credit losses. Interest income earned and realized gains and losses on the sale of investments classified as loans and receivables are recorded in the Consolidated Statements of Earnings and included in net investment income.

Investment properties are real estate held to earn rental income or for capital appreciation. Investment properties are initially measured at cost and subsequently carried at fair value on the Consolidated Balance Sheets. All changes in fair value are recorded as net investment income in the Consolidated Statements of Earnings. Properties held to earn rental income or for capital appreciation that have an insignificant portion that is owner occupied or where there is no intent to occupy on a long-term basis are classified as investment properties. Properties that do not meet these criteria are classified as owner occupied properties. Property that is leased that would otherwise be classified as investment property if owned by the Company is also included within investment properties.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

Fair Value Measurement

Financial instrument carrying values necessarily reflect the prevailing market liquidity and the liquidity premiums embedded within the market pricing methods that the Company relies upon.

Fair value movement on the assets supporting insurance contract liabilities is a major factor in the movement of insurance contract liabilities. Changes in the fair value of bonds designated or classified as fair value through profit or loss that support insurance and investment contract liabilities are largely offset by corresponding changes in the fair value of liabilities except when the bond has been deemed impaired.

The following is a description of the methodologies used to value instruments carried at fair value:

Bonds - Fair Value Through Profit or Loss and Available-for-Sale

Fair values for bonds classified and designated as fair value through profit or loss or available-for-sale are determined with reference to quoted market bid prices primarily provided by third-party independent pricing sources. Where prices are not quoted in a normally active market, fair values are determined by valuation models. The Company maximizes the use of observable inputs when measuring fair value. The Company obtains quoted prices in active markets, when available, for identical assets at the balance sheet date to measure bonds at fair value in its fair value through profit or loss and available-for-sale portfolios.

The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Bonds and Mortgages - Loans and Receivables

For disclosure purposes only, fair values for bonds and mortgages classified as loans and receivables are determined by discounting expected future cash flows using current market rates for similar instruments. Valuation inputs typically include benchmark yields and risk-adjusted spreads based on current lending activities and market activity.

Stocks - Fair Value Through Profit or Loss and Available-for-Sale

Fair values for stocks traded on an active market are generally determined by the last bid price for the security from the exchange where it is principally traded. Fair values for stocks for which there is no active market is typically based upon alternative valuation techniques such as discounted cash flow analysis, review of price movement relative to the market and utilization of information provided by the underlying investment manager. The Company maximizes the use of observable inputs when measuring fair value. The Company obtains quoted prices in active markets, when available, for identical assets at the balance sheet date to measure stocks at fair value in its fair value through profit or loss and available-for-sale portfolios.

Investment Properties

Fair values for investment properties are determined using independent qualified appraisal services and include management adjustments for material changes in property cash flows, capital expenditures or general market conditions in the interim period between appraisals. The determination of the fair value of investment property requires the use of estimates including future cash flows (such as future leasing assumptions, rental rates, capital and operating expenditures) and discount, reversionary and overall capitalization rates applicable to the asset based on current market conditions. Investment property under construction is valued at fair value if such values can be reliably determined; otherwise they are recorded at cost.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

Impairment

Investments are reviewed regularly on an individual basis to determine impairment status. The Company considers various factors in the impairment evaluation process, including, but not limited to, the financial condition of the issuer, specific adverse conditions affecting an industry or region, decline in fair value not related to interest rates, bankruptcy or defaults, and delinquency in payments of interest or principal.

Investments are deemed to be impaired when there is objective evidence that timely collection of future cash flows can no longer be reliably estimated. The fair value of an investment is not a definitive indicator of impairment, as it may be significantly influenced by other factors including the remaining term to maturity and liquidity of the asset; however, market price is taken into consideration when evaluating impairment.

For impaired mortgages and bonds classified as loans and receivables, provisions are established or write-offs made to adjust the carrying value to the net realizable amount. Wherever possible the fair value of collateral underlying the loans or observable market price is used to establish net realizable value. For impaired available-for-sale bonds recorded at fair value, the accumulated loss recorded in accumulated other comprehensive income is reclassified to net investment income. Impairments on available-for-sale debt instruments are reversed if there is objective evidence that a permanent recovery has occurred. All gains and losses on bonds classified or designated as fair value through profit or loss are already recorded in net investment income; therefore a reduction due to impairment of these assets will be recorded in net investment income. As well, when determined to be impaired, interest is no longer accrued and previous interest accruals are reversed.

Securities Lending

The Company engages in securities lending through its securities custodians as lending agents. Loaned securities are not derecognized, and continue to be reported within invested assets, as the Company retains substantial risks and rewards and economic benefits related to the loaned securities.

(b) Transaction Costs

Transaction costs are expensed as incurred for financial instruments classified as fair value through profit or loss. Transaction costs for financial assets classified as available-for-sale or loans and receivables are added to the value of the instrument at acquisition and taken into net earnings using the effective interest method. Transaction costs for financial liabilities classified as other than fair value through profit or loss are included in the value of the instrument issued and taken into net earnings using the effective interest method.

(c) Cash and Cash Equivalents

Cash and cash equivalents comprise cash, current operating accounts, overnight bank and term deposits with maturities of three months or less held for the purpose of meeting short-term cash requirements. Net payments in transit and overdraft bank balances are included in other liabilities.

(d) Trading Account Assets

Trading account assets consist of investments in open ended investment companies and sponsored unit-trusts in Europe, which are carried at fair value based on the net asset value of these funds. Investments in these assets are included in other assets on the Consolidated Balance Sheets with realized and unrealized gains and losses reported in the Consolidated Statements of Earnings.

(e) Debentures and Other Debt Instruments and Capital Trust Securities

Debentures and other debt instruments and capital trust securities are initially recorded on the Consolidated Balance Sheets at fair value and subsequently carried at amortized cost using the effective interest method with amortization expense recorded in financing charges in the Consolidated Statements of Earnings. These liabilities are derecognized when the obligation is cancelled or redeemed.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

(f) Other Assets and Other Liabilities

Other assets, which include prepaid expenses, deferred acquisition costs and miscellaneous other assets, are measured at cost. Other liabilities, which include, deferred income reserves and bank overdraft, are measured at cost. Pension and other post-employment benefits also included within other assets and other liabilities are measured in accordance with note 2(w).

(g) Participating Account

The Company's accounts are comprised of two main sub-divisions, the Participating Account and the Shareholder Account. The liabilities for participating policies issued or assumed by the Company prior to demutualization are held in closed block sub-accounts. These liabilities for guaranteed and other non-guaranteed benefits are determined using best estimate assumptions. If at any time the value of the assets allocated to these policies were, in the opinion of the Appointed Actuary, less than the assets required in the long term to support the liabilities of these policies and the future reasonable expectations of the policyholders, assets having a sufficient value to rectify the situation would be transferred first from the additional ancillary sub-accounts maintained in the participating account for this purpose and then, if the deficiency is expected to be permanent, from the shareholder account. Any such transfers from the shareholder account would be recorded as a charge to shareholder net earnings.

The second main division comprises the open block sub-accounts containing all liabilities in respect of new participating policies issued on or after demutualization. On demutualization, \$50 of seed capital was transferred from shareholder surplus to the participating account. The seed capital amount, together with a reasonable rate of return, may be transferred to the shareholder account if the seed capital is no longer required to support the new participating policies. Transfers of seed capital to the shareholder account would be returns of capital and would be recorded as adjustments to shareholder surplus. A reasonable rate of return on seed capital is recognized as income on the shareholder account and as an expense in the participating account when paid. To date all seed capital has been repaid except for \$20 (U.S. \$15).

(h) Derivative Financial Instruments

The Company uses derivative products as risk management instruments to hedge or manage asset, liability and capital positions, including fee and investment income. The Company's policy guidelines prohibit the use of derivative instruments for speculative trading purposes.

The Company includes disclosure of the maximum credit risk, future credit exposure, credit risk equivalent and risk weighted equivalent in note 28 as prescribed by the Office of the Superintendent of Financial Institutions (OSFI) in Canada.

All derivatives including those that are embedded in financial and non-financial contracts that are not closely related to the host contracts are recorded at fair value on the Consolidated Balance Sheets. The method of recognizing unrealized and realized fair value gains and losses depends on whether the derivatives are designated as hedging instruments. For derivatives that are not designated as hedging instruments, unrealized and realized gains and losses are recorded in net investment income on the Consolidated Statements of Earnings. For derivatives designated as hedging instruments, unrealized and realized gains and losses are recognized according to the nature of the hedged item.

Derivatives are valued using market transactions and other market evidence whenever possible, including market based inputs to models, broker or dealer quotations or alternative pricing sources with reasonable levels of price transparency. When models are used, the selection of a particular model to value a derivative depends on the contractual terms of, and specific risks inherent in, the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation models require a variety of inputs, including contractual terms, market prices and rates, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs.

2. *Basis of Presentation and Summary of Accounting Policies (cont'd)*

To qualify for hedge accounting, the relationship between the hedged item and the hedging instrument must meet several strict conditions on documentation, probability of occurrence, hedge effectiveness and reliability of measurement. If these conditions are not met, the relationship does not qualify for hedge accounting treatment and both the hedged item and the hedging instrument are reported independently as if there was no hedging relationship.

Where a hedging relationship exists, the Company documents all relationships between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedge transactions. This process includes linking derivatives that are used in hedging transactions to specific assets and liabilities on the Consolidated Balance Sheets or to specific firm commitments or forecasted transactions. The Company also assesses, both at the hedge's inception and on an ongoing basis, whether derivatives that are used in hedging transactions are effective in offsetting changes in fair values or cash flows of hedged items. Hedge effectiveness is reviewed quarterly through correlation testing. Hedge accounting is discontinued when the hedging no longer qualifies for hedge accounting.

Derivatives not designated as hedges for accounting purposes

For derivative investments not designated as accounting hedges, changes in fair value are recorded in net investment income.

Fair value hedges

For fair value hedges, changes in fair value of both the hedging instrument and the hedged risk are recorded in net investment income and consequently any ineffective portion of the hedge is recorded immediately in net investment income.

The Company currently has no instruments designated as fair value hedges.

Cash flow hedges

For cash flow hedges, the effective portion of the changes in fair value of the hedging instrument is recorded in the same manner as the hedged item in other comprehensive income while the ineffective portion is recognized immediately in net investment income. Gains and losses that accumulate in other comprehensive income are recorded in net investment income in the same period the hedged item affects net earnings. Gains and losses on cash flow hedges are immediately reclassified from other comprehensive income to net investment income if and when it is probable that a forecasted transaction is no longer expected to occur.

The Company does not have any instruments designated as cash flow hedges.

Net investment hedges

For net investment hedges the effective portion of changes in the fair value of the hedging instrument are recorded in other comprehensive income while the ineffective portion is recognized immediately in net investment income. The unrealized foreign exchange gains (losses) on the instruments are recorded within accumulated other comprehensive income and will be reclassified into net earnings when the Company disposes of the foreign operation.

The Company currently has an instrument designated as a net investment hedge.

(i) Embedded Derivatives

An embedded derivative is a component of a host contract that modifies the cash flows of the host contract in a manner similar to a derivative, according to a specified interest rate, financial instrument price, foreign exchange rate, underlying index or other variable. Embedded derivatives are treated as separate contracts and are recorded at fair value if their economic characteristics and risks are not closely related to those of the host contract and the host contract is not itself recorded at fair value through the Consolidated Statements of Earnings. Embedded derivatives that meet the definition of an insurance contract are accounted for and measured as an insurance contract.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

(j) Foreign Currency Translation

The Company operates with multiple functional currencies. The Company's consolidated financial statements are presented in Canadian dollars as this presentation is most meaningful to financial statement users. For those subsidiaries with different functional currencies, exchange rate differences arising from the translation of monetary items that form part of the net investment in the foreign operation are recorded in unrealized foreign exchange gains (losses) on translation of foreign operations in other comprehensive income.

For the purpose of presenting consolidated financial statements, assets and liabilities are translated into Canadian dollars at the rate of exchange prevailing at the balance sheet dates and all income and expense items are translated at an average of daily rates. Unrealized foreign currency translation gains and losses on translation of the Company's net investment in its foreign operations are presented separately, as a component of other comprehensive income. Unrealized gains and losses will be recognized proportionately in net investment income on the Consolidated Statements of Earnings when there has been a disposal of the investment in the foreign operations.

Foreign currency translation gains and losses on foreign currency transactions of the Company are included in net investment income.

(k) Loans to Policyholders

Loans to policyholders are classified as loans and receivables and measured at amortized cost. Loans to policyholders are shown at their unpaid principal balance and are fully secured by the cash surrender values of the policies. Carrying value of loans to policyholders approximates their fair value.

(l) Reinsurance Contracts

The Company, in the normal course of business, is a user of reinsurance in order to limit the potential for losses arising from certain exposures and a provider of reinsurance. Assumed reinsurance refers to the acceptance of certain insurance risks by the Company underwritten by another company. Ceded reinsurance refers to the transfer of insurance risk, along with the respective premiums, to one or more reinsurers who will share the risks. To the extent that assuming reinsurers are unable to meet their obligations, the Company remains liable to its policyholders for the portion reinsured. Consequently, allowances are made for reinsurance contracts which are deemed uncollectible.

Reinsurance contracts are insurance contracts and undergo the classification as described within the Insurance and Investment Contract Liabilities section of this note. Assumed reinsurance premiums, commissions and claim settlements, as well as the reinsurance assets associated with insurance and investment contracts, are accounted for in accordance with the terms and conditions of the underlying reinsurance contract. Reinsurance assets are reviewed for impairment on a regular basis for any events that may trigger impairment. The Company considers various factors in the impairment evaluation process, including but not limited to, collectability of amounts due under the terms of the contract. The carrying amount of a reinsurance asset is adjusted through an allowance account with any impairment loss being recorded in the Consolidated Statements of Earnings.

Any gains or losses on buying reinsurance are recognized in the Consolidated Statements of Earnings immediately at the date of purchase in accordance with the Canadian Asset Liability Method.

Assets and liabilities related to reinsurance are reported on a gross basis in the Consolidated Balance Sheets. The amount of liabilities ceded to reinsurers is estimated in a manner consistent with the claim liability associated with reinsured risks.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

(m) Funds Held by Ceding Insurers/Funds Held Under Reinsurance Contracts

On the asset side, funds held by ceding insurers are assets that would normally be paid to the Company but are withheld by the cedant to reduce potential credit risk. Under certain forms of reinsurance contracts it is customary for the cedant to retain amounts on a funds withheld basis supporting the insurance or investment contract liabilities ceded. For the funds withheld assets where the underlying asset portfolio is managed by the Company, the credit risk is retained by the Company. The funds withheld balance where the Company assumes the credit risk is measured at the fair value of the underlying asset portfolio with the change in fair value recorded in net investment income. See note 6 for funds held by ceding insurers that are managed by the Company. Other funds held by ceding insurers are general obligations of the cedant and serve as collateral for insurance contract liabilities assumed from cedants. Funds withheld assets on these contracts do not have fixed maturity dates, their release generally being dependent on the run-off of the corresponding insurance contract liabilities.

On the liability side, funds held under reinsurance contracts consist mainly of amounts retained by the Company from ceded business written on a funds withheld basis. The Company withholds assets related to ceded insurance contract liabilities in order to reduce credit risk.

(n) Business Combinations, Goodwill and Intangible Assets

Business combinations are accounted for using the acquisition method. The Company identifies and classifies, in accordance with the Company's accounting policies, all assets acquired and liabilities assumed as at the acquisition date. Goodwill represents the excess of purchase consideration over the fair value of net assets of the acquired subsidiaries of the Company. Following initial recognition, goodwill is measured at cost less accumulated impairment losses.

Intangible assets represent finite life and indefinite life intangible assets of acquired subsidiaries of the Company and software acquired or internally developed by the Company. Finite life intangible assets include the value of technology/software, certain customer contracts and distribution channels. These finite life intangible assets are amortized over their estimated useful lives, typically ranging between 3 and 30 years.

Indefinite life intangible asset includes brand value. Amounts are classified as indefinite life intangible assets based on an analysis of all the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the Company. The identification of indefinite life intangible assets is made by reference to relevant factors such as product life cycles, potential obsolescence, industry stability and competitive position. Following initial recognition, indefinite life intangible assets are measured at cost less accumulated impairment losses.

Impairment Testing

Goodwill and indefinite life intangible assets are tested for impairment annually or more frequently if events indicate that impairment may have occurred. Intangible assets that were previously impaired are reviewed at each reporting date for evidence of reversal. In the event that certain conditions have been met, the Company would be required to reverse the impairment charge or a portion thereof.

Goodwill and indefinite life intangible assets have been allocated to cash generating unit groupings, representing the lowest level that the assets are monitored for internal reporting purposes. Goodwill and indefinite life intangible assets are tested for impairment by comparing the carrying value of each cash generating unit grouping containing the assets to its recoverable amount. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount.

The recoverable amount is the higher of the asset's fair value less costs of disposal and value-in-use.

Finite life intangible assets are reviewed annually to determine if there are indicators of impairment and assess whether the amortization period and method are appropriate. If indicators of impairment have been identified, a test for impairment is performed and then the amortization of these assets are adjusted or impairment is recognized as necessary.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

(o) Revenue Recognition

Premiums for all types of insurance contracts, and contracts with limited mortality or morbidity risk, are generally recognized as revenue when due and collection is reasonably assured.

Interest income on bonds and mortgages is recognized and accrued using the effective yield method.

Dividend income is recognized when the right to receive payment is established. This is the ex-dividend date for listed stocks, and usually the notification date or date when the shareholders have approved the dividend for private equity instruments.

Investment property income includes rents earned from tenants under lease agreements and property tax and operating cost recoveries. Rental income leases with contractual rent increases and rent-free periods are recognized on a straight-line basis over the term of the lease.

Fee and other income primarily includes fees earned from management of segregated fund assets and fees earned from management services. Fee and other income is recognized when services are rendered and the amount can be reasonably estimated.

The Company has sub-advisor arrangements where the Company retains the primary obligation with the client; as a result, fee income earned is reported on a gross basis with the corresponding sub-advisor expense recorded in operating and administrative expenses.

(p) Owner Occupied Properties and Fixed Assets

Property held for own use and fixed assets are carried at cost less accumulated depreciation and impairments. Depreciation is charged to write-off the cost of assets, over their estimated useful lives, using the straight-line method, on the following bases:

Owner occupied properties	15 - 20 years
Furniture and fixtures	5 - 10 years
Other fixed assets	3 - 10 years

Depreciation methods, useful lives and residual values are reviewed at least annually and adjusted if necessary.

(q) Deferred Acquisition Costs

Included in other assets are deferred acquisition costs. These are recognized as assets if the costs are incremental and incurred due to the contract being issued and are primarily amortized on a straight-line basis over the policy term, not to exceed 20 years.

(r) Segregated Funds

Segregated funds assets and liabilities arise from contracts where all financial risks associated with the related assets are borne by policyholders and are presented separately in the Consolidated Balance Sheets. The assets and liabilities are set equal to the fair value of the underlying asset portfolio. Investment income and changes in fair value of the segregated fund assets are offset by a corresponding change in the segregated fund liabilities.

(s) Insurance and Investment Contract Liabilities

Contract Classification

When significant insurance risk exists, the Company's products are classified at contract inception as insurance contracts, in accordance with IFRS 4, *Insurance Contracts* (IFRS 4). Significant insurance risk exists when the Company agrees to compensate policyholders or beneficiaries of the contract for specified uncertain future events that adversely affect the policyholder and whose amount and timing is unknown. Refer to note 12 for discussion of insurance risk.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

In the absence of significant insurance risk, the contract is classified as an investment contract. Investment contracts with discretionary participating features are accounted for in accordance with IFRS 4 and investment contracts without discretionary participating features are accounted for in accordance with IAS 39, *Financial Instruments: Recognition & Measurement*. The Company has not classified any contracts as investment contracts with discretionary participating features.

Investment contracts may be reclassified as insurance contracts after inception if insurance risk becomes significant. A contract that is classified as an insurance contract at contract inception remains as such until all rights and obligations under the contract are extinguished or expire.

Investment contracts are contracts that carry financial risk, which is the risk of a possible future change in one or more of the following: interest rate, commodity price, foreign exchange rate, or credit rating. Refer to note 7 for discussion of Financial Instruments Risk Management.

Measurement

Insurance contract liabilities represent the amounts required, in addition to future premiums and investment income, to provide for future benefit payments, policyholder dividends, commission and policy administrative expenses for all insurance and annuity policies in force with the Company. The Appointed Actuary of the Company is responsible for determining the amount of the liabilities to make appropriate provisions for the Company's obligations to policyholders. The Appointed Actuary determines the liabilities for insurance contracts using generally accepted actuarial practices, according to the standards established by the Canadian Institute of Actuaries. The valuation uses the Canadian Asset Liability Method. This method involves the projection of future events in order to determine the amount of assets that must be set aside currently to provide for all future obligations and involves a significant amount of judgment.

In the computation of insurance contract liabilities, valuation assumptions have been made regarding rates of mortality/morbidity, investment returns, levels of operating expenses, rates of policy termination and rates of utilization of elective policy options or provisions. The valuation assumptions use best estimates of future experience together with a margin for adverse deviation. These margins are necessary to provide for possibilities of mis-estimation and/or future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Margins are reviewed periodically for continued appropriateness.

Investment contract liabilities are measured at fair value determined using discounted cash flows utilizing the yield curves of financial instruments with similar cash flow characteristics.

(t) Deferred Income Reserves

Included in other liabilities are deferred income reserves relating to investment contracts. These are amortized on a straight-line basis to recognize the initial policy fees over the policy term, not to exceed 20 years.

(u) Income Taxes

The income tax expense for the period represents the sum of current income tax and deferred income tax. Income tax is recognized as an expense or income in profit or loss except to the extent that it relates to items that are recognized outside profit or loss (whether in other comprehensive income or directly in equity), in which case the income tax is also recognized outside profit or loss.

Current Income Tax

Current income tax is based on taxable income for the year. Current income tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities using the tax rates that have been enacted or substantively enacted at the balance sheet date in each respective jurisdiction. Current income tax assets and current income tax liabilities are offset if a legally enforceable right exists to offset the recognized amounts and the entity intends either to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

A provision for tax uncertainties which meet the probable threshold for recognition is measured based on the probability weighted average approach.

Deferred Income Tax

Deferred income tax is the tax expected to be payable or recoverable on differences arising between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable income and is accounted for using the balance sheet liability method. Deferred income tax liabilities are generally recognized for all taxable temporary differences and deferred income tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences, unused tax losses and carryforwards can be utilized.

Recognition is based on the fact that it is probable that the entity will have taxable profits and/or tax planning opportunities available to allow the deferred income tax asset to be utilized. Changes in circumstances in future periods may adversely impact the assessment of the recoverability. The uncertainty of the recoverability is taken into account in establishing the deferred income tax assets. The Company's annual financial planning process provides a significant basis for the measurement of deferred income tax assets.

Deferred income tax assets and liabilities are measured at the tax rates expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date. Deferred income tax assets and deferred income tax liabilities are offset if a legally enforceable right exists to net current income tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered.

Deferred income tax liabilities are recognized for taxable temporary differences arising on investments in subsidiaries and associates, except where the group controls the timing of the reversal of the temporary difference and it is probable that the temporary differences will not reverse in the foreseeable future.

(v) Policyholder Benefits

Policyholder benefits include benefits and claims on life insurance contracts, maturity payments, annuity payments and surrenders. Gross benefits and claims for life insurance contracts include the cost of all claims arising during the year and settlement of claims. Death claims and surrenders are recorded on the basis of notifications received. Maturities and annuity payments are recorded when due.

(w) Pension Plans and Other Post-Employment Benefits

The Company and its subsidiaries maintain contributory and non-contributory defined benefit pension plans for certain employees and advisors. The Company and its subsidiaries also provide post-employment health, dental and life insurance benefits to eligible employees, advisors and their dependents.

The present value of the defined benefit obligations and the related current service cost is determined using the projected unit credit method (note 23). Pension plan assets are recorded at fair value.

For the Company and its subsidiaries' defined benefit plans, service costs and net interest costs are recognized in the Consolidated Statements of Earnings. Service costs include current service cost, administration expenses, past service costs and the impact of curtailments and settlements. To determine the net interest costs (income) recognized in the Consolidated Statements of Earnings, the Company applies a discount rate to the net benefit liability (asset), where the discount rate is determined by reference to market yields at the beginning of the year on high quality corporate bonds.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

For the Company and its subsidiaries defined benefit plans, re-measurements of the net defined benefit liability (asset) due to asset returns less (greater) than interest income, actuarial losses (gains) and changes in the asset ceiling are recognized in the Consolidated Statements of Comprehensive Income.

The Company and its subsidiaries also maintain defined contribution pension plans for certain employees and advisors. For the Company and its subsidiaries defined contribution plans, the current service costs are recognized in the Consolidated Statements of Earnings.

(x) Share Capital and Surplus

Financial instruments issued by the Company are classified as share capital if they represent a residual interest in the assets of the Company. Preferred share capital is classified as equity if it is non-redeemable, or retractable only at the Company's option and any dividends are discretionary. Incremental costs that are directly attributable to the issue of share capital are recognized as a deduction from equity, net of income tax.

Accumulated other comprehensive income (loss) represents the total of the unrealized foreign exchange gains (losses) on translation of foreign operations, the unrealized gains (losses) on available-for-sale assets, the unrealized gains (losses) on cash flow hedges, and the remeasurements on defined benefit pension and other post-employment benefit plans net of tax, where applicable.

Non-controlling interests in subsidiaries represents the proportion of equity that is attributable to minority shareholders.

Participating account surplus represents the proportion of equity attributable to the participating account of the Company and its subsidiaries.

(y) Share-Based Payments

Lifeco has a stock option plan (the Lifeco stock option plan) that provides for the granting of options on common shares of Lifeco to certain officers and employees of Lifeco and its affiliates.

The Company follows the fair value method of accounting for the valuation of compensation expense for shares and share options granted to employees under its stock option plans (note 22). Compensation expense is recognized as an increase to compensation expense in the Consolidated Statements of Earnings over the vesting period of the granted options.

The Company has Deferred Share Unit Plans (DSU Plans) in which Directors of the Company participate. Units issued under the DSU Plans vest when granted. The Company recognizes an increase in operating and administrative expenses for the units granted under the DSU Plans.

Certain employees of the Company are entitled to participate in the Performance Share Unit Plan (PSU Plan). Units issued under the Performance Share Unit Plan vest over a three year period. The Company uses the fair value method to recognize compensation expense for the units granted under the plan with a corresponding increase in the liability based on the market value of Lifeco's common shares.

The Company has an Employee Share Ownership Program (ESOP) where, subject to certain conditions being met, the Company will match contributions up to a maximum amount to purchase Lifeco common shares. The Company's contributions are expensed within operating and administrative expenses as incurred.

(z) Leases

Leases that do not transfer substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases, where the Company is the lessee, are charged to net earnings over the period of use.

Where the Company is the lessor under an operating lease for its investment property, the assets subject to the lease arrangement are presented within the Consolidated Balance Sheets. Income from these leases is recognized in the Consolidated Statements of Earnings on a straight-line basis over the lease term.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

Investments in a lease that transfers substantially all the risks and rewards of ownership to the lessee are classified as a finance lease. The Company is the lessor under a finance lease and the investment is recognized as a receivable at an amount equal to the net investment in the lease, which is represented as the present value of the minimum lease payments due from the lessee and is presented within the Consolidated Balance Sheets. Payments received from the lessee are apportioned between the recognition of finance lease income and the reduction of the finance lease receivable. Income from the finance leases is recognized in the Consolidated Statements of Earnings at a constant periodic rate of return on the Company's net investment in the finance lease.

(aa) Operating Segments

Operating segments have been identified based on internal reports that are regularly reviewed by the Company's Chief Executive Officer to allocate resources and assess performance of segments. The Company's reportable business segments are the participating and shareholder operations. Within these segments the major business units are: Individual Insurance, Wealth Management, Group Insurance, Europe/ Reinsurance, United States and Corporate. These business units reflect the Company's management structure and internal financial reporting. Each of these business units operates in the financial services industry and the revenues are derived principally from life, health and disability insurance, annuity products, creditor and direct marketing, savings products and life, accident and health reinsurance. Business activities and transactions that are not associated with the specific business units are attributed to Corporate.

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

(ab) Future Accounting Policies

IFRS that have been issued by the IASB and could impact the Company are as follows:

New Standard	Summary of Future Changes
IFRS 4 - <i>Insurance Contracts</i>	<p>In September 2016, the IASB issued an amendment to IFRS 4, <i>Insurance Contracts</i> (IFRS 4). The amendment “Applying IFRS 9, <i>Financial Instruments</i> with IFRS 4, <i>Insurance Contracts</i>” provides qualifying insurance companies with two options to address the potential volatility associated with implementing the IFRS 9, <i>Financial Instruments</i> (IFRS 9) standard before the new proposed insurance contract standard is effective. The two options are as follows:</p> <ul style="list-style-type: none"> • <i>Deferral Approach</i> - provides the option to defer implementation of IFRS 9 until the year 2021 or the effective date of the new insurance contract standard, whichever is earlier; or • <i>Overlay Approach</i> - provides the option to recognize the volatility that could arise when IFRS 9 is applied within other comprehensive income, rather than profit or loss. <p>The Company qualifies for the amendment and will be applying the deferral approach to allow adoption of both IFRS 9 and the new insurance contract standard simultaneously on January 1, 2021.</p>
IFRS 9 - <i>Financial Instruments</i>	<p>In July 2014, the IASB issued a final version of IFRS 9, <i>Financial Instruments</i> to replace IAS 39, <i>Financial Instruments: Recognition and Measurement</i>. The standard provides changes to financial instruments accounting for the following:</p> <ul style="list-style-type: none"> • classification and measurement of financial instruments based on a business model approach for managing financial assets and the contractual cash flow characteristics of the financial asset; • impairment based on an expected loss model; and • hedge accounting that incorporates the risk management practices of an entity. <p>Due to applying the deferral method as noted above, the standard will be effective for the Company on January 1, 2021.</p>

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

New Standard	Summary of Future Changes
IFRS 15 - <i>Revenue from Contracts with Customers</i>	<p>In May 2014, the IASB issued IFRS 15, <i>Revenue from Contracts with Customers</i>, which provides a single revenue recognition standard to align the financial reporting of revenue from contracts with customers and related costs. The revenue arising from insurance contracts, leases and financial instruments are not required to apply the revenue recognition requirements in IFRS 15. A company would recognize revenue when it transfers goods or services to a customer in the amount of consideration the company expects to receive from the customer.</p> <p>In September 2015, the IASB issued an amendment to IFRS 15 providing a deferral of one year of the effective date of the standard, from January 1, 2017 to January 1, 2018.</p> <p>In April 2016, an additional amendment to IFRS 15 was issued clarifying requirements of the standard and providing additional transitional relief for companies implementing the standard.</p> <p>The Company is evaluating the impact of the adoption of this standard, The Company does not anticipate a significant impact for the adoption of this standard, however it is not possible as yet to provide a reliable estimate of the impact on the Company's financial statements.</p>
IFRS 16 - <i>Leases</i>	<p>In January 2016, the IASB issued IFRS 16, <i>Leases</i>, which introduces new guidance for identifying leases as well as a new right-of-use accounting model for lessees, replacing the operating and finance lease accounting models that currently exist. The new accounting model will generally require all lessees to recognize lease assets and liabilities on the balance sheet, initially measured at the present value of unavoidable lease payments for all leases with a maximum possible term of more than 12 months.</p> <p>In contrast to the significant changes for lessees, the new standard will retain many key aspects of the current lessor accounting model.</p> <p>The standard is effective January 1, 2019. The Company is evaluating the impact of the adoption of this standard, however it is not yet possible to provide a reliable estimate of the impact on the Company's financial statements.</p>
<i>Annual Improvements 2014 - 2016 Cycle</i>	<p>In December 2016, the IASB issued <i>Annual Improvements 2014 - 2016 Cycle</i> as part of its ongoing process to efficiently deal with non-urgent narrow scope amendments to IFRS. Three amendments were included in this issue relating to IFRS 12, <i>Disclosure if Interests in Other Entities</i>, IFRS 1, <i>First-time Adoption of International Financial Reporting Standards</i> and IAS 28 <i>Investments in Associates and Joint Ventures</i>.</p> <p>The amendments to IFRS 12 are effective January 1, 2017, while the amendments to IFRS 1 and IAS 28 are effective January 1, 2018. Adoption of these amendments will not have an impact on the Company's consolidated financial statements.</p>

2. Basis of Presentation and Summary of Accounting Policies (cont'd)

New Standard	Summary of Future Changes
IAS 40 - <i>Investment Property</i>	<p>In December 2016, the IASB issued an amendment to IAS 40, <i>Investment Property</i> to clarify the requirements on transfers to, or from, investment property.</p> <p>The amendment is effective January 1, 2018. The Company is evaluating the impact of the adoption of this standard.</p>
IAS 7 - <i>Statement of Cash Flows</i>	<p>In January 2016, the IASB issued an amendment to IAS 7, <i>Statement of Cash Flows</i> that requires additional disclosures to enable users of the financial statements to evaluate changes in liabilities arising from financing activities.</p> <p>The amendment is effective January 1, 2017. Adoption of this amendment will not have a significant impact on the Company's consolidated financial statements.</p>
IFRS 2 - <i>Share-based Payment</i>	<p>In June 2016, the IASB issued narrow scope amendments to IFRS 2, <i>Share-based Payment</i> clarifying how to account for certain types of share-based payment transactions.</p> <p>The amendment is effective January 1, 2018. The Company is evaluating the impact of the adoption of this amendment.</p>
IAS 12 - <i>Income Taxes</i>	<p>In January 2016, the IASB issued an amendment to IAS 12, <i>Income Taxes</i> that clarifies the accounting for deferred tax assets for unrealized losses on debt instruments measured at fair value.</p> <p>The amendment is effective January 1, 2017. Adoption of this amendment will not have an impact on the Company's consolidated financial statements.</p>
IFRIC 22 - <i>Foreign Currency Transactions and Advance Consideration</i>	<p>In December 2016, the IASB issued IFRIC Interpretation 22, <i>Foreign Currency Transactions and Advance Consideration</i> that provides requirements about which exchange rate to use in reporting foreign currency transactions when payment is made or received in advance.</p> <p>The interpretation is effective January 1, 2018. The Company is evaluating the impact of the adoption of this interpretation.</p>

3. Business Acquisitions

On August 1, 2016, the Company, through an indirect wholly owned Irish subsidiary, Irish Life Group Limited (Irish Life), completed the acquisition of Aviva Health Insurance Ireland Limited (Aviva Health), an Irish health insurance company, and obtained control of GloHealth Financial Services Limited (GloHealth), where Irish Life previously held 49%. The fair value of the 49% equity interest in GloHealth at acquisition was \$32 which includes a fair value increase of \$24 recorded in net investment income for the period ended December 31, 2016. The Company now holds 100% of the equity interest of GloHealth.

During the fourth quarter of 2016, the Company completed its comprehensive evaluation of the fair value of the net assets acquired from both Aviva Health and GloHealth and the purchase price allocation. As a result, initial goodwill presented in the September 30, 2016 interim financial statements of \$126 recognized upon the acquisition of Aviva Health and GloHealth has been adjusted in the fourth quarter of 2016. Adjustments were made to the provisional amounts disclosed in the September 30, 2016 interim unaudited financial statements for the recognition and measurement of intangible assets.

The amounts assigned to the assets acquired, goodwill, liabilities assumed and contingent consideration on August 1, 2016 reported as at December 31, 2016 for both Aviva Health and GloHealth are as follows:

Assets acquired and goodwill

Cash and cash equivalents	\$	85
Portfolio investments		123
Reinsurance assets		242
Other assets		292
Intangibles		35
Goodwill		95
Total assets acquired and goodwill	\$	872

Liabilities assumed and contingent consideration

Insurance contract liabilities	\$	360
Other liabilities		318
Contingent consideration		37
Total liabilities assumed and contingent consideration	\$	715

The following provides the change in the carrying value from September 30 to December 31 of the goodwill on the acquisition:

Goodwill previously reported at September 30, 2016	\$	126
Recognition and measurement of intangible assets		(35)
Deferred tax liabilities and other adjustments to purchase price allocation		4
Goodwill reported at December 31, 2016	\$	95

The goodwill represents the excess of the purchase price over the fair value of the net assets, representing the synergies or future economic benefits arising from other assets acquired that are not individually identified and separately recognized in the acquisition. The goodwill is not deductible for tax purposes.

Aviva Health was rebranded as Irish Life Health, the combined operations of Aviva Health and GloHealth contributed \$117 in revenue and incurred net losses of \$8, which included acquisition and restructuring expenses of \$13, from the date of acquisition to December 31, 2016. These amounts are included in the Consolidated Statements of Earnings and Comprehensive Income.

4. Cash and Cash Equivalents

	<u>2016</u>	<u>2015</u>
Cash	\$ 1,118	\$ 1,281
Short-term deposits	821	468
Total	<u><u>\$ 1,939</u></u>	<u><u>\$ 1,749</u></u>

At December 31, 2016 cash of \$171 was restricted for use by the Company (\$147 at December 31, 2015) in respect of cash held in trust for reinsurance agreements or with regulatory authorities, cash held under certain indemnity arrangements, client monies held by brokers and cash held in escrow.

5. Portfolio Investments

(a) Carrying values and estimated fair values of portfolio investments are as follows:

	2016		2015	
	Carrying value	Fair value	Carrying value	Fair value
Bonds				
Designated fair value through profit or loss ⁽¹⁾	\$ 45,771	\$ 45,771	\$ 45,836	\$ 45,836
Classified fair value through profit or loss ⁽¹⁾	62	62	111	111
Available-for-sale	6,338	6,338	6,554	6,554
Loans and receivables	7,787	8,699	7,674	8,441
	59,958	60,870	60,175	60,942
Mortgage loans				
Residential	1,697	1,808	1,717	1,876
Commercial	4,913	5,432	5,800	6,438
	6,610	7,240	7,517	8,314
Stocks				
Designated fair value through profit or loss ⁽¹⁾	2,445	2,445	2,212	2,212
Available-for-sale	1	1	2	2
Available-for-sale, at cost ⁽²⁾	135	135	127	127
Equity method	193	193	219	219
	2,774	2,774	2,560	2,560
Investment properties	3,033	3,033	3,703	3,703
Total	\$ 72,375	\$ 73,917	\$ 73,955	\$ 75,519

⁽¹⁾ A financial asset is designated as fair value through profit or loss on initial recognition if it eliminates or significantly reduces an accounting mismatch. Changes in the fair value of financial assets designated as fair value through profit or loss are generally offset by changes in insurance contract liabilities, since the measurement of insurance contract liabilities is determined with reference to the assets supporting the liabilities.

A financial asset is classified as fair value through profit or loss on initial recognition if it is part of a portfolio that is actively traded for the purpose of earning investment income.

⁽²⁾ Fair value cannot be reliably measured, therefore the investments are held at cost.

(b) Carrying value of bonds and mortgages by term to maturity are as follows:

	2016			
	Term to maturity			Total
	1 year or less	Over 1-5 years	Over 5 years	
Bonds	\$ 7,086	\$ 10,368	\$ 42,469	\$ 59,923
Mortgage loans	119	1,211	5,225	6,555
Total	\$ 7,205	\$ 11,579	\$ 47,694	\$ 66,478

5. Portfolio Investments (cont'd)

	2015			
	Term to maturity			Total
	1 year or less	Over 1-5 years	Over 5 years	
Bonds	\$ 6,822	\$ 11,038	\$ 42,269	\$ 60,129
Mortgage loans	217	942	6,329	7,488
Total	<u>\$ 7,039</u>	<u>\$ 11,980</u>	<u>\$ 48,598</u>	<u>\$ 67,617</u>

The above excludes the carrying value of impaired bonds and mortgage loans, as the ultimate timing of collectability is uncertain.

(c) Certain stocks where equity method earnings are computed are discussed below:

Stocks include the Company's 30.43% investment (30.43% at December 31, 2015), held through Irish Life, in Allianz Ireland, an unlisted general insurance company operating in Ireland.

	2016	2015
Carrying value, beginning of year	\$ 218	\$ 191
Equity method share of Allianz comprehensive income	2	18
Dividends received	(18)	(4)
Foreign exchange rate changes	(10)	13
Carrying value, end of year	<u>\$ 192</u>	<u>\$ 218</u>
Share of equity, end of year	<u>\$ 140</u>	<u>\$ 161</u>

The fair value of Allianz Ireland as at December 31, 2016 and December 31, 2015 approximates the carrying value.

The Company and Allianz Ireland both have a year-end date of December 31. The Company's year-end financial results are approved and reported before Allianz Ireland reports its financial results; therefore, the Company reports Allianz Ireland's financial information by estimating the amount of income attributable to the Company, based on prior quarter information, to complete equity method accounting. The difference between actual and estimated results is reflected in the subsequent quarter and is not material to the Company's financial statements.

(d) Included in portfolio investments are the following:

- (i) Carrying amount of impaired investments

	2016	2015
Impaired amounts by classification		
Fair value through profit or loss	\$ 32	\$ 43
Available-for-sale	4	3
Loans and receivables	55	29
Total	<u>\$ 91</u>	<u>\$ 75</u>

The carrying amount of impaired investments includes \$35 bonds, \$1 stocks and \$55 mortgage loans at December 31, 2016 (\$46 bonds and \$29 mortgage loans at December 31, 2015). The above carrying values for loans and receivables are net of allowances of \$36 at December 31, 2016 and \$16 at December 31, 2015.

5. Portfolio Investments (cont'd)

- (ii) The allowance for credit losses and changes in the allowances for credit losses related to investments classified as loans and receivables are as follows:

	2016			2015		
	Bonds	Mortgage loans	Total	Bonds	Mortgage loans	Total
Balance, beginning of year	\$ —	\$ 16	\$ 16	\$ —	\$ 15	\$ 15
Net provision for credit losses - in year	1	31	32	—	—	—
Write-offs, net of recoveries	—	(6)	(6)	—	—	—
Other (including foreign exchange rate changes)	—	(6)	(6)	—	1	1
Balance, end of year	\$ 1	\$ 35	\$ 36	\$ —	\$ 16	\$ 16

The allowance for credit losses is supplemented by the provision for future credit losses included in insurance contract liabilities.

(e) Net investment income comprises the following:

	2016					
	Bonds	Mortgage loans	Stocks	Investment properties	Other	Total
Regular net investment income:						
Investment income earned	\$ 2,287	\$ 325	\$ 56	\$ 190	\$ 87	\$ 2,945
Net realized gains						
Available-for-sale	54	—	—	—	—	54
Other classifications	1	22	—	—	—	23
Net allowances for credit losses on loans and receivables	(1)	(31)	—	—	—	(32)
Other income and expenses	—	—	—	(11)	(57)	(68)
	2,341	316	56	179	30	2,922
Changes in fair value on fair value through profit or loss assets:						
Classified fair value through profit or loss	3	—	—	—	—	3
Designated fair value through profit or loss	3,130	—	271	—	(142)	3,259
Recorded at fair value through profit or loss	—	—	—	(26)	—	(26)
	3,133	—	271	(26)	(142)	3,236
Total	\$ 5,474	\$ 316	\$ 327	\$ 153	\$ (112)	\$ 6,158

5. Portfolio Investments (cont'd)

	2015					
	Bonds	Mortgage loans	Stocks	Investment properties	Other	Total
Regular net investment income:						
Investment income earned	\$ 2,370	\$ 358	\$ 65	\$ 200	\$ (12)	\$ 2,981
Net realized gains						
Available-for-sale	69	—	—	—	—	69
Other classifications	1	49	—	—	—	50
Other income and expenses	—	—	—	(17)	(62)	(79)
	2,440	407	65	183	(74)	3,021
Changes in fair value on fair value through profit or loss assets:						
Classified fair value through profit or loss	(1)	—	—	—	—	(1)
Designated fair value through profit or loss	(1,443)	—	(67)	—	51	(1,459)
Recorded at fair value through profit or loss	—	—	—	211	—	211
	(1,444)	—	(67)	211	51	(1,249)
Total	\$ 996	\$ 407	\$ (2)	\$ 394	\$ (23)	\$ 1,772

Investment income earned comprises income from investments that are classified as available-for-sale, loans and receivables and investments classified or designated as fair value through profit or loss. Investment income from bonds and mortgages includes interest income and premium and discount amortization. Income from stocks includes dividends, distributions from private equity and equity income from the investment in Allianz Ireland. Investment properties income includes rental income earned on investment properties, ground rent income earned on leased and sub-leased land, fee recoveries, lease cancellation income, and interest and other investment income earned on investment properties. Other income includes policyholder loan income, foreign exchange gains and losses, income earned from derivative financial instruments and other miscellaneous income.

(f) The carrying value of investment properties and changes in the carrying value of investment properties are as follows:

	2016	2015
Balance, beginning of year	\$ 3,703	\$ 3,286
Additions	51	109
Change in fair value through profit or loss	(26)	211
Disposals	(62)	(282)
Foreign exchange rate changes	(633)	379
Balance, end of year	\$ 3,033	\$ 3,703

5. Portfolio Investments (cont'd)

(g) Transferred Financial Assets

The Company engages in securities lending to generate additional income. The Company's securities custodians are used as lending agents. Collateral, which exceeds the fair value of the loaned securities, is deposited by the borrower with the Company's lending agent and maintained by the lending agent until the underlying security has been returned. The fair value of the loaned securities is monitored on a daily basis by the lending agent who obtains or refunds additional collateral as the fair value of the loaned securities fluctuates. In addition, the securities lending agent indemnifies the Company against borrower risk, meaning that the lending agent agrees contractually to replace securities not returned due to a borrower default. As at December 31, 2016, the Company had loaned securities (which are included in invested assets) with a fair value of \$4,851 (\$3,456 at December 31, 2015).

6. Funds Held by Ceding Insurers

At December 31, 2016, the Company had amounts on deposit of \$10,186 (\$15,111 at December 31, 2015) for funds held by ceding insurers on the Consolidated Balance Sheets. Income and expenses arising from the agreements are included in net investment income on the Consolidated Statements of Earnings.

During 2016, the Company completed the transfer of approximately \$1,600 of annuity policies from The Equitable Life Assurance Company (Equitable Life) acquired during 2015. As a result, the related assets presented as Funds Held by Ceding Insurers at December 31, 2015 are recorded in Portfolio Investments at December 31, 2016.

During 2016, a subsidiary of the Company completed a portfolio transfer of approximately \$1,300 whereby investment contract liabilities and supporting bonds and cash were acquired. The portfolio of investment contract liabilities had been previously reinsured by the Company on a funds withheld basis. As a result, the related assets presented in Funds Held by Ceding Insurers at December 31, 2015 are recorded in Portfolio Investments at December 31, 2016.

The details of the funds on deposit for certain agreements where the Company has credit risk are as follows:

(a) Carrying values and estimated fair values:

	2016		2015	
	Carrying value	Fair value	Carrying value	Fair value
Cash and cash equivalents	\$ 214	\$ 214	\$ 180	\$ 180
Bonds	8,391	8,391	13,472	13,472
Other assets	118	118	178	178
Total	\$ 8,723	\$ 8,723	\$ 13,830	\$ 13,830
Supporting:				
Reinsurance liabilities	\$ 8,218	\$ 8,218	\$ 13,222	\$ 13,222
Surplus	505	505	608	608
Total	\$ 8,723	\$ 8,723	\$ 13,830	\$ 13,830

6. Funds Held by Ceding Insurers (cont'd)

(b) The following provides details of the carrying value of bonds included in the funds on deposit by issuer and industry sector:

	2016	2015
Bonds issued or guaranteed by:		
Treasuries	\$ 1,143	\$ 2,357
Government related	1,506	2,153
Agency securitized	3	20
Non-agency securitized	1,126	1,580

BBB	476	798
BB and lower	205	386
Total	\$ 8,391	\$ 13,472

7. Financial Instruments Risk Management

The Company has policies relating to the identification, measurement, management monitoring and reporting of risks associated with financial instruments. The key risks related to financial instruments are credit risk, liquidity risk and market risk (currency, interest rate and equity). The Risk Committee of the Board of Directors is responsible for the oversight of the Company's key risks.

The following sections describe how the Company manages each of these risks.

(a) Credit Risk

Credit risk is the risk of loss resulting from an obligor's potential inability or unwillingness to fully meet its contractual obligations to the Company.

The following policies and procedures are in place to manage this risk:

- Investment policies are in place that require only the purchase of investment-grade assets and minimize undue concentration within issuers, connected companies, industries or individual geographies.
- Investment limits specify minimum and maximum limits for each asset class.
- Identification of credit risk through an internal credit risk rating system which includes a detailed assessment of an obligor's creditworthiness. Internal credit risk ratings cannot be higher than the highest rating provided by certain independent ratings companies.
- Portfolios are monitored continuously, and reviewed regularly with the Risk Committee and the Investment Committee of the Board of Directors.
- Credit risk associated with derivative instruments is evaluated quarterly based on conditions that existed at the balance sheet date, using practices that are at least as conservative as those recommended by regulators. The Company seeks to mitigate derivative credit risk by setting rating based counterparty limits in investment policies and through collateral arrangements where possible.
- Counterparties providing reinsurance to the Company are reviewed for financial soundness as part of an ongoing monitoring process. The minimum financial strength of reinsurers is outlined in the Corporate Reinsurance Ceded Risk Management Policy. The Company seeks to minimize reinsurance credit risk by setting rating based limits on net ceded exposure by counterparty as well as seeking protection in the form of collateral or funds withheld arrangements where possible.
- Investment guidelines also specify collateral requirements.

7. Financial Instruments Risk Management (cont'd)

(i) Maximum Exposure to Credit Risk

The following summarizes the Company's maximum exposure to credit risk related to financial instruments. The maximum credit exposure is the carrying value of the asset net of any allowances for losses.

	2016	2015
Cash and cash equivalents	\$ 1,939	\$ 1,749
Bonds		
Fair value through profit or loss	45,833	45,947
Available-for-sale	6,338	6,554
Loans and receivables	7,787	7,674
Mortgage loans	6,610	7,517
Loans to policyholders	973	985
Funds held by ceding insurers ⁽¹⁾	10,186	15,111
Reinsurance assets	9,309	8,669
Interest due and accrued	665	763
Accounts receivable	1,012	615
Premiums in course of collection	645	237
Trading account assets	81	89
Finance leases receivable	80	97
Other assets ⁽²⁾	97	176
Derivative assets	206	279
Total	\$ 91,761	\$ 96,462

⁽¹⁾ Includes \$8,723 (\$13,830 at December 31, 2015) of funds held by ceding insurers where the Company retains the credit risk of the assets supporting the liabilities ceded (note 6).

⁽²⁾ Includes items such as current income taxes receivable and miscellaneous other assets of the Company (note 11).

Credit risk is also mitigated by entering into collateral agreements. The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented regarding the acceptability of types of collateral and the valuation parameters. Management monitors the value of the collateral, requests additional collateral when needed and performs an impairment valuation when applicable. The Company has \$6 of collateral received from counterparties as at December 31, 2016 (\$81 at December 31, 2015) relating to derivative assets.

(ii) Concentration of Credit Risk

Concentrations of credit risk arise from exposures to a single debtor, a group of related debtors or groups of debtors that have similar credit risk characteristics in that they operate in the same geographic region or in similar industries. The characteristics are similar in that changes in economic or political environments may impact their ability to meet obligations as they come due.

7. Financial Instruments Risk Management (cont'd)

The following provides details of the carrying value of bonds by issuer, industry sector and geographic distribution:

2016				
	Canada	Europe/ Reinsurance	United States	Total
Bonds issued or guaranteed by:

7. Financial Instruments Risk Management (cont'd)

(iv) Loans Past Due, But Not Impaired

Loans that are past due but not considered impaired are loans for which scheduled payments have not been received, but management has reasonable assurance of collection of the full amount of principal and interest due. The following provides carrying values of the loans past due, but not impaired:

	2016	2015
Greater than 90 days	\$ 1	\$ 1

- (v) The following outlines the future asset credit losses provided for in insurance contract liabilities. These amounts are in addition to the allowances for asset losses included with assets:

	2016	2015
Participating	\$ 318	\$ 381
Non-participating	1,293	1,662
Total	\$ 1,611	\$ 2,043

(b) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet all cash outflow obligations as they come due. The following policies and procedures are in place to manage this risk:

- The Company closely manages operating liquidity through cash flow matching of assets and liabilities and forecasting earned and required yields, to ensure consistency between policyholder requirements and the yield of assets. Approximately 85% (approximately 87% in 2015) of insurance and investment contract liabilities are non-cashable prior to maturity or subject to fair value adjustments.
- Management closely monitors the solvency and capital positions of the Company and its principal subsidiaries opposite liquidity requirements. Additional liquidity is available through established lines of credit or the capital markets.

	Payments due by period						
	Total	1 year	2 years	3 years	4 years	5 years	over 5 years
Debentures	\$ 1,236	\$ 284	\$ —	\$ —	\$ —	\$ —	\$ 952
Capital trust securities ⁽¹⁾	150	—	—	—	—	—	150
Purchase obligations	37	5	8	20	4	—	—
Pension contributions	93	93	—	—	—	—	—
Total	\$ 1,516	\$ 382	\$ 8	\$ 20	\$ 4	\$ —	\$ 1,102

- ⁽¹⁾ Payments due have not been reduced to reflect that the Company held capital trust securities of \$25 principal amount (\$34 carrying value).

7. Financial Instruments Risk Management (cont'd)

(c) Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market factors which include three types: currency risk, interest rate (including related inflation) risk and equity risk.

Caution Related to Risk Sensitivities

These financial statements include estimates of sensitivities and risk exposure measures for certain risks, such as the sensitivity due to specific changes in interest rate levels projected and market prices as at the valuation date. Actual results can differ significantly from these estimates for a variety of reasons including:

- Assessment of the circumstances that led to the scenario may lead to changes in (re)investment approaches and interest rate scenarios considered,
- Changes in actuarial, investment return and future investment activity assumptions,
- Actual experience differing from the assumptions,
- Changes in business mix, effective income tax rates and other market factors,
- Interactions among these factors and assumptions when more than one changes, and
- The general limitations of the Company's internal models.

For these reasons, the sensitivities should only be viewed as directional estimates of the underlying sensitivities for the respective factors based on the assumptions outlined above. Given the nature of these calculations, the Company cannot provide assurance that the actual impact on net earnings attributed to shareholders will be as indicated.

(i) Currency Risk

Currency risk relates to the Company operating and holding financial instruments in different currencies. For the assets backing insurance and investment contract liabilities that are not matched by currency, changes in foreign exchange rates can expose the Company to the risk of foreign exchange losses not offset by liability decreases. The Company has net investments in foreign operations. The Company's debt obligations are denominated in Canadian dollars, euros, and U.S. dollars. In accordance with IFRS, foreign currency translation gains and losses from net investments in foreign operations, net of related hedging activities and tax effects, are recorded in accumulated other comprehensive income. Strengthening or weakening of the Canadian dollar spot rate compared to the U.S. dollar, British pound and euro spot rates impacts the Company's total equity. Correspondingly, the Company's book value per share and capital ratios monitored by rating agencies are also impacted.

The following policies and procedures are in place to mitigate the Company's exposure to currency risk:

- The Company uses financial measures such as constant currency calculations to monitor the effect of currency translation fluctuations.
- Investments are normally made in the same currency as the liabilities supported by those investments. Segmented Investment Guidelines include maximum tolerances for unhedged currency mismatch exposures.
- For assets backing liabilities not matched by currency, the Company would normally convert the assets back to the currency of the liability using foreign exchange contracts.
- A 10% weakening of the Canadian dollar against foreign currencies would be expected to increase non-participating insurance and investment contract liabilities and their supporting assets by approximately the same amount resulting in an immaterial change to net earnings. A 10% strengthening of the Canadian dollar against foreign currencies would be expected to decrease non-participating insurance and investment contract liabilities and their supporting assets by approximately the same amount resulting in an immaterial change in net earnings.

7. Financial Instruments Risk Management (cont'd)

(ii) Interest Rate Risk

Interest rate risk exists if asset and liability cash flows are not closely matched and interest rates change causing a difference in value between the asset and liability. The following policies and procedures are in place to mitigate the Company's exposure to interest rate risk:

- The Company utilizes a formal process for managing the matching of assets and liabilities. This involves grouping general fund assets and liabilities into segments. Assets in each segment are managed in relation to the liabilities in the segment.
- Interest rate risk is managed by investing in assets that are suitable for the products sold.
- Where these products have benefit or expense payments that are dependent on inflation (inflation-indexed annuities, pensions and disability claims) the Company generally invests in real return instruments to hedge its real dollar liability cash flows. Some protection against changes in the inflation index is achieved as any related change in the fair value of the assets will be largely offset by a similar change in the fair value of the liabilities.
- For products with fixed and highly predictable benefit payments, investments are made in fixed income assets or real estate whose cash flows closely match the liability product cash flows. Where assets are not available to match certain period cash flows, such as long-tail cash flows, a portion of these are invested in equities and the rest are duration matched. Hedging instruments are employed where necessary when there is a lack of suitable permanent investments to minimize loss exposure to interest rate changes. To the extent these cash flows are matched, protection against interest rate change is achieved and any change in the fair value of the assets will be offset by a similar change in the fair value of the liabilities.
- For products with less predictable timing of benefit payments, investments are made in fixed income assets with cash flows of a shorter duration than the anticipated timing of benefit payments, or equities as described below.
- The risk associated with the mismatch in portfolio duration and cash flow, asset prepayment exposure and the pace of asset acquisition are quantified and reviewed regularly.

Projected cash flows from the current assets and liabilities are used in the Canadian Asset Liability Method to determine insurance contract liabilities. Valuation assumptions have been made regarding rates of returns on supporting assets, fixed income, equity and inflation. The valuation assumptions use best estimates of future reinvestment rates and inflation assumptions with an assumed correlation together with margins for adverse deviation set in accordance with professional standards. These margins are necessary to provide for possibilities of misestimation and/or future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Margins are reviewed periodically for continued appropriateness.

Projected cash flows from fixed income assets used in actuarial calculations are reduced to provide for potential asset default losses. The net effective yield rate reduction averaged 0.16% (0.20% in 2015). The calculation for future credit losses on assets is based on the credit quality of the underlying asset portfolio.

Testing under a number of interest rate scenarios (including increasing, decreasing and fluctuating rates) is done to assess reinvestment risk. The total provision for interest rates is sufficient to cover a broader or more severe set of risks than the minimum arising from the current Canadian Institute of Actuaries prescribed scenarios.

7. Financial Instruments Risk Management (cont'd)

The range of interest rates covered by these provisions is set in consideration of long-term historical results and is monitored quarterly with a full review annually. An immediate 1% parallel shift in the yield curve would not have a material impact on the Company's view of the range of interest rates to be covered by the provisions. If sustained however, the parallel shift could impact the Company's range of scenarios covered.

The total provision for interest rates also considers the impact of the Canadian Institute of Actuaries prescribed scenarios:

- The effect of an immediate 1% parallel increase in the yield curve on the prescribed scenarios would not change the total provision for interest rates.
- The effect of an immediate 1% parallel decrease in the yield curve on the prescribed scenarios would not change the total provision for interest rates.

Another way of measuring the interest rate risk associated with this assumption is to determine the effect on the insurance and investment contract liabilities impacting the shareholders' net earnings of the Company of a 1% change in the Company's view of the range of interest rates to be covered by these provisions. The following provides information on the effect of an immediate 1% increase or 1% decrease in the interest rates at both the low and high end of the range of interest rates recognized in the provisions:

	2016		2015	
	1% increase	1% decrease	1% increase	1% decrease
Change in interest rates				
Increase (decrease) in insurance and investment contract liabilities	\$ (139)	\$ 415	\$ (107)	\$ 366
Increase (decrease) in net earnings	\$ 101	\$ (305)	\$ 65	\$ (254)

(iii) Equity Risk

Equity risk is the uncertainty associated with the valuation of assets and liabilities arising from changes in equity markets and other pricing risk. To mitigate pricing risk, the Company has investment policy guidelines in place that provide for prudent investment in equity markets within clearly defined limits. The risks associated with segregated fund guarantees have been mitigated through reinsurance treaties and a hedging program for lifetime Guaranteed Minimum Withdrawal Benefit guarantees using equity futures, currency forwards, and interest rate derivatives. For policies with segregated fund guarantees, the Company generally determines insurance contract liabilities at a conditional tail expectation of 75 (CTE75) level.

Some insurance and investment contract liabilities are supported by investment properties, common stocks and private equities, for example segregated fund products and products with long-tail cash flows. Generally these liabilities will fluctuate in line with equity values. There will be additional impacts on these liabilities as equity values fluctuate. The following provides information on the expected impacts of a 10% increase or 10% decrease in equity values:

	2016		2015	
	10% increase	10% decrease	10% increase	10% decrease
Change in equity values				
Increase (decrease) in non-participating insurance and investment contract liabilities	\$ (47)	\$ 55	\$ (49)	\$ 88
Increase (decrease) in net earnings	\$ 40	\$ (45)	\$ 42	\$ (69)

7. Financial Instruments Risk Management (cont'd)

The best estimate return assumptions for equities are primarily based on long-term historical averages. Changes in the current market could result in changes to these assumptions and will impact both asset and liability cash flows. The following provides information on the expected impacts of a 1% increase or 1% decrease in the best estimate assumptions:

	2016		2015	
	1% increase	1% decrease	1% increase	1% decrease
Change in best estimate return assumptions				
Increase (decrease) in non-participating insurance contract liabilities	\$ (387)	\$ 405	\$ (421)	\$ 430
Increase (decrease) in net earnings	\$ 321	\$ (331)	\$ 351	\$ (352)

(d) Enforceable Master Netting Arrangements or Similar Agreements

The Company enters into International Swaps and Derivative Association's (ISDA's) master agreements for transacting over-the-counter derivatives. The Company receives and pledges collateral according to the related ISDA's Credit Support Annexes. The ISDA's master agreements do not meet the criteria for offsetting on the Consolidated Balance Sheets because they create a right of set-off that is enforceable only in the event of default, insolvency, or bankruptcy.

For exchange-traded derivatives subject to derivative clearing agreements with the exchanges and clearinghouses, there is no provision for set-off at default. Initial margin is excluded from the table within this disclosure as it would become part of a pooled settlement process.

The Company's reverse repurchase agreements are also subject to right of set-off in the event of default. These transactions and agreements include master netting arrangements which provide for the netting of payment obligations between the Company and its counterparties in the event of default.

The table sets out the potential effect on the Company's Consolidated Balance Sheets on financial instruments that have been shown in a gross position where right of set-off exists under certain circumstances that do not qualify for netting on the Consolidated Balance Sheets.

	2016			
	Related amounts not set-off in the Balance Sheet			Net exposure
	Gross amount of financial instruments presented in the Balance Sheet	Offsetting counterparty position ⁽¹⁾	Financial collateral received/pledged ⁽²⁾	
Financial instruments - assets				
Derivative financial instruments	\$ 206	\$ (177)	\$ (4)	\$ 25
Total financial instruments - assets	\$ 206	\$ (177)	\$ (4)	\$ 25
Financial instruments - liabilities				
Derivative instruments	\$ 1,032	\$ (177)	\$ (268)	\$ 587
Total financial instruments - liabilities	\$ 1,032	\$ (177)	\$ (268)	\$ 587

7. Financial Instruments Risk Management (cont'd)

	2015			
	Related amounts not set-off in the Balance Sheet			Net exposure
	Gross amount of financial instruments presented in the Balance Sheet	Offsetting counterparty position ⁽¹⁾	Financial collateral received/pledged ⁽²⁾	
Financial instruments - assets				
Derivative financial instruments	\$ 279	\$ (165)	\$ (78)	\$ 36
Reverse repurchase agreements ⁽³⁾	43	—	(43)	—
Total financial instruments - assets	<u>\$ 322</u>	<u>\$ (165)</u>	<u>\$ (121)</u>	<u>\$ 36</u>
Financial instruments - liabilities				
Derivative instruments	\$ 1,244	\$ (165)	\$ (272)	\$ 807
Total financial instruments - liabilities	<u>\$ 1,244</u>	<u>\$ (165)</u>	<u>\$ (272)</u>	<u>\$ 807</u>

⁽¹⁾ Includes counterparty amounts recognized on the Consolidated Balance Sheets where the Company has a potential offsetting position (as described above) but does not meet the criteria for offsetting on the balance sheet, excluding collateral.

⁽²⁾ Financial collateral presented above excludes overcollateralization and, for exchange-traded derivatives, initial margin. Financial collateral received on reverse repurchase agreements is held by a third party. Total financial collateral, including initial margin and overcollateralization, received on derivative assets was \$6 (\$81 at December 31, 2015), received on reverse repurchase agreements was nil (\$44 at December 31, 2015), and pledged on derivative liabilities was \$303 (\$317 at December 31, 2015).

⁽³⁾ Assets related to reverse repurchase agreements are included in bonds, in the Consolidated Balance Sheets.

8. Fair Value Measurement

The Company's assets and liabilities recorded at fair value have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Assets and liabilities utilizing Level 1 inputs include actively exchange-traded equity securities, exchange-traded futures, and mutual and segregated funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, government and agency securities, restricted stock, some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans. Investment contracts that are measured at fair value through profit or loss are mostly included in the Level 2 category.

8. Fair Value Measurement (cont'd)

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds, certain asset-backed securities, some private equities, investments in mutual and segregated funds where there are redemption restrictions, certain over-the-counter derivatives, and investment properties.

The following presents the Company's assets and liabilities measured at fair value on a recurring basis by hierarchy level:

Assets measured at fair value	2016			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 1,939	\$ —	\$ —	\$ 1,939
Financial assets at fair value through profit or loss				
Bonds	—	45,832	1	45,833
Stocks	2,427	1	17	2,445
Total financial assets at fair value through profit or loss	2,427	45,833	18	48,278
Available-for-sale financial assets				
Bonds	—	6,338	—	6,338
Stocks	—	—	1	1
Total available-for-sale financial assets	—	6,338	1	6,339
Investment properties	—	—	3,033	3,033
Funds held by ceding insurers	214	8,391	—	8,605
Derivatives ⁽¹⁾	1	205	—	206
Reinsurance assets	—	162	—	162
Other assets - trading account assets	81	—	—	81
Total assets measured at fair value	\$ 4,662	\$ 60,929	\$ 3,052	\$ 68,643

⁽¹⁾ Amount of other comprehensive income for investment properties represents the unrealized gain on foreign exchange.

⁽²⁾ Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors or the lifting of redemption restrictions on investments in mutual and segregated funds.

⁽³⁾ Includes investments in mutual and segregated funds where there are redemption restrictions. The fair value is based on observable, quoted prices.

8. Fair Value Measurement (cont'd)

The following sets out information about significant unobservable inputs used at year-end in measuring assets and liabilities categorized as Level 3 in the fair value hierarchy:

Type of asset	Valuation approach	Significant unobservable input	Input value	Inter-relationship between key unobservable inputs and fair value measurement
Investment properties	Investment property valuations are generally determined using property valuation models based on expected capitalization rates and models that discount expected future net cash flows. The determination of the fair value of investment property requires the use of estimates such as future cash flows (such as future leasing assumptions, rental rates, capital and operating expenditures) and discount, reversionary and overall capitalization rates applicable to the asset based on current market rates.	Discount rate	Range of 2.9% - 10.3%	A decrease in the discount rate would result in an increase in fair value. An increase in the discount rate would result in a decrease in fair value.
		Reversionary rate	Range of 5.0% - 8.3%	A decrease in the reversionary rate would result in an increase in fair value. An increase in the reversionary rate would result in a decrease in fair value.
		Vacancy rate	Weighted average of 1.4%	A decrease in the expected vacancy rate would generally result in an increase in fair value. An increase in the expected vacancy rate would generally result in a decrease in fair value.

8. Fair Value Measurement (cont'd)

The following presents the Company's assets and liabilities disclosed at fair value on a recurring basis by hierarchy level:

	2016				
	Level 1	Level 2	Level 3	Other assets/ liabilities not held at fair value	Total
Assets disclosed at fair value					
Loans and receivables financial assets					
Bonds	\$ —	\$ 7,416	\$ 74	\$ 1,209	\$ 8,699
Mortgage loans	—	7,240	—	—	7,240

Capital trust securities	—	215	—	—	215
Total liabilities disclosed at fair value	\$ —	\$ 666	\$ —	\$ 607	\$ 1,273

⁽¹⁾ Fair value of certain stocks available for sale cannot be reliably measured, therefore, these investments are recorded at cost.

⁽²⁾ Other stocks include the Company's investment in Allianz Ireland, an unlisted general insurance company operating in Ireland, and a joint venture in GloHealth where the Company obtained control in 2016 (note 3).

9. Goodwill and Intangible Assets

(a) Goodwill

- (i) The carrying value of goodwill, all in the shareholder segment, and changes in the carrying value of goodwill are as follows:

	2016	2015
Balance, beginning of year	\$ 731	\$ 675
Business acquisitions (note 3)	95	—
Changes in foreign exchange rates	(70)	56
Balance, end of year	\$ 756	\$ 731

9. Goodwill and Intangible Assets (cont'd)

- (ii) Within the operating segments of the Company, goodwill has been assigned to cash generating unit groupings, representing the lowest level in which goodwill is monitored for internal reporting purposes. The Company does not allocate insignificant amounts of goodwill and indefinite life intangible assets across multiple cash generating unit groupings. Goodwill is tested for impairment by comparing the carrying value of each cash generating unit grouping to which goodwill has been assigned to its recoverable amount as follows:

	2016	2015
Individual Insurance/Wealth Management	\$ 26	\$ 26
Insurance and Annuities	711	686
United States	19	19
Total	\$ 756	\$ 731

(b) Intangible Assets

Intangible assets of \$335 (\$302 in 2015) include indefinite life and finite life intangible assets. The carrying value and changes in the carrying value of these intangible assets are as follows:

- (i) Indefinite life intangible assets:

Indefinite life intangible assets have been assigned to the Insurance and Annuities cash generating unit grouping within the Europe/Reinsurance business unit.

	2016		
	Brands and trademarks	Customer contract related	Total
Cost			
Balance, beginning of year	\$ 144	\$ 3	\$ 147
Transfer to finite life	—	(3)	(3)

Additions	39	—	46	85
Transfer from indefinite life	3	—	—	3
Changes in foreign exchange rates	(7)	(2)	(5)	(14)
Balance, end of year	\$ 162	\$ 28	\$ 184	\$ 374
Accumulated amortization and impairment				
Balance, beginning of year	\$ (30)	\$ (13)	\$ (102)	\$ (145)
Changes in foreign exchange rates	3	—	3	6
Amortization	(13)	(1)	(22)	(36)
Balance, end of year	\$ (40)	\$ (14)	\$ (121)	\$ (175)
Net carrying amount	\$ 122	\$ 14	\$ 63	\$ 199
2015				
	Customer contract related	Distribution channels	Software	Total
	9 - 12 years	30 years	3 - 10 years	
	Straight-line	Straight-line	Straight-line	
Cost				
Balance, beginning of year	\$ 119	\$ 27	\$ 124	\$ 270
Additions	—	—	13	13
Changes in foreign exchange rates	8	3	6	17
Balance, end of year	\$ 127	\$ 30	\$ 143	\$ 300
Accumulated amortization and impairment				
Balance, beginning of year	\$ (16)	\$ (10)	\$ (89)	\$ (115)
Disposals	(3)	(2)	(3)	(8)
Amortization	(11)	(1)	(10)	(22)
Balance, end of year	\$ (30)	\$ (13)	\$ (102)	\$ (145)
Net carrying amount	\$ 97	\$ 17	\$ 41	\$ 155

The weighted average remaining amortization period of the customer contract related and distribution channels are 10 and 17 years respectively (8 and 18 years respectively at December 31, 2015).

9. Goodwill and Intangible Assets (cont'd)

(c) Recoverable Amount

For the purposes of annual impairment testing, the Company allocates goodwill and indefinite life intangible assets to cash generating unit groupings. Any potential impairment of goodwill or indefinite life intangible assets is identified by comparing the recoverable amount of a cash generating unit grouping to its carrying value. Recoverable amount is based on fair value less cost of disposal.

Fair value is initially assessed with reference to valuation multiples of comparable publicly-traded financial institutions and precedent business acquisitions transactions. These valuation multiples may include price-to-earnings or price-to-book measures for life insurers and asset managers. This assessment may give regard to a variety of relevant considerations, including expected growth, risk and capital market conditions, among other factors. The valuation multiples used in assessing fair value represent Level 2 inputs.

In the fourth quarter of 2016, the Company conducted its annual impairment testing of goodwill and indefinite life intangible assets based on September 30, 2016 asset balances. It was determined that the recoverable amounts of cash generating unit groupings were in excess of their carrying values and there was no evidence of impairment.

Any reasonable changes in assumptions and estimates used in determining recoverable amounts of cash generating unit groupings is unlikely to cause carrying values to exceed recoverable amounts.

10. Owner Occupied Properties and Fixed Assets

The carrying value of owner occupied properties and fixed assets and the changes in the carrying value of owner occupied properties and fixed assets are as follows:

	2016	2015
Carrying value, beginning of year	\$ 230	\$ 221
Less: accumulated depreciation/impairments	(7)	(6)
Net carrying value, beginning of year	223	215
Additions	6	3
Depreciation	(2)	(1)
Changes in foreign exchange rates	(6)	6
Net carrying value, end of year	\$ 221	\$ 223

The net carrying value of fixed assets is \$60 at December 31, 2016 (\$63 at December 31, 2015).

There are no restrictions on the title of the owner occupied properties and fixed assets nor are they pledged as security for debt.

11. Other Assets

	2016	2015
Deferred acquisition costs	\$ 523	\$ 632
Defined benefit pension plan asset (note 23)	214	250
Trading account assets	81	89
Finance lease receivable	80	97
Prepaid expenses	17	15
Miscellaneous other assets	79	132
Total	\$ 994	\$ 1,215

Total other assets of \$181 (\$241 at December 31, 2015) are expected to be realized within 12 months from the reporting date. This amount excludes deferred acquisition costs, the changes in which are noted below.

Deferred acquisition costs

	2016	2015
Balance, beginning of year	\$ 632	\$ 604
Additions	60	68
Amortization	(46)	(47)
Changes in foreign exchange rates	(73)	60
Disposals	(50)	(53)
Balance, end of year	\$ 523	\$ 632

Finance leases receivable

The Company has two finance leases on properties in Europe. These properties have been leased for a 35-year term.

The finance leases receivable for the two properties, in aggregate, is as follows:

	2016	
	Minimum lease payments	Present value of minimum lease payments
One year	\$ 4	\$ 4
Over one year to five years	16	14
Over five years	175	62
	195	80
Less: unearned finance lease income	115	—
Total finance leases receivable	\$ 80	\$ 80

The internal rate of return for the leases is fixed at the contract dates and will remain fixed for the duration of the contracts, ranging between 5.4% and 6.2%

12. Insurance and Investment Contract Liabilities**(a) Insurance and investment contract liabilities**

	2016		
	Gross liability	Reinsurance assets	Net
Insurance contract liabilities	\$ 78,459	\$ 9,147	\$ 69,312
Investment contract liabilities	1,925	162	1,763
Total	\$ 80,384	\$ 9,309	\$ 71,075

Total carrying value	\$ 59,958	\$ 6,610	\$ 2,774	\$ 3,033	\$ 124,617	\$ 196,992
Fair value	\$ 60,870	\$ 7,240	\$ 2,774	\$ 3,033	\$ 124,617	\$ 198,534

2. Insurance and Investment Contract Liabilities (cont'd)

	2015 (note 32)					
	Bonds	Mortgage loans	Stocks	Investment properties	Other	Total
Carrying value						
Participating liabilities						
Individual Insurance	\$ 3,777	\$ 1,257	\$ 497	\$ 191	\$ 565	\$ 6,287
Europe/Reinsurance	1,087	40	154	71	167	1,519
United States	2,094	358	—	—	249	2,701
Non-participating liabilities						
Individual Insurance	4,248	140	1,022	—	187	5,597
Wealth Management	6,208	713	116	—	1,213	8,250
Group Insurance	878	152	—	—	444	1,474
Europe/Reinsurance	31,343	4,357	222	3,342	18,885	58,149
United States	563	94	—	—	1,467	2,124
Other liabilities	3,064	202	195	18	103,031	106,510
Total equity	6,913	204	354	81	3,532	11,084
Total carrying value	<u>\$ 60,175</u>	<u>\$ 7,517</u>	<u>\$ 2,560</u>	<u>\$ 3,703</u>	<u>\$ 129,740</u>	<u>\$ 203,695</u>
Fair value	<u>\$ 60,942</u>	<u>\$ 8,314</u>	<u>\$ 2,560</u>	<u>\$ 3,703</u>	<u>\$ 129,740</u>	<u>\$ 205,259</u>

Cash flows of assets supporting insurance and investment contract liabilities are matched within reasonable limits. Changes in the fair values of these assets are essentially offset by changes in the fair value of insurance and investment contract liabilities.

Changes in the fair values of assets backing capital and surplus, less related income taxes, would result in a corresponding change in surplus over time in accordance with investment accounting policies.

(c) Changes in insurance contract liabilities

The change in insurance contract liabilities during the year was the result of the following business activities and changes in actuarial estimates:

	2016		
	Participating		
	Gross liability	Reinsurance assets	Net
Balance, beginning of year	\$ 10,481	\$ (283)	\$ 10,764
Impact of new business	(147)	—	(147)
Normal change in force	644	(31)	675
Management action and changes in assumptions	(70)	(1)	(69)
Impact of foreign exchange rate changes	(204)	(1)	(203)
Balance, end of year	<u>\$ 10,704</u>	<u>\$ (316)</u>	<u>\$ 11,020</u>

12. Insurance and Investment Contract Liabilities (cont'd)

Business movement from/to affiliates	57	(37)	94	94
Impact of foreign exchange rate changes	6,463	778	5,685	6,315
Balance, end of year	\$ 73,442	\$ 8,764	\$ 64,678	\$ 75,442

12. Insurance and Investment Contract Liabilities (cont'd)

Under fair value accounting, movement in the fair value of the supporting assets is a major factor in the movement of insurance contract liabilities. Changes in the fair value of assets are largely offset by corresponding changes in the fair value of liabilities. The change in the value of the insurance contract liabilities associated with the change in the value of the supporting assets is included in the normal change in force above.

In 2016, the major contributors to the decrease in net insurance contract liabilities were the impact of foreign exchange rate changes of \$9,101, management action and changes in assumptions of \$401 and the business movement to/from affiliates of \$177, partially offset by increases due to impact of new business of \$2,034 and normal change in force of \$1,519.

Net non-participating insurance contract liabilities decreased by \$332 in 2016 due to management actions and assumption changes. The decrease was primarily due to updated longevity assumptions of \$227, updated economic assumptions of \$170, updated morbidity assumptions of \$47 and modeling refinements of \$40 and updates to other provisions of \$11. This was partially offset by increases due to updated expense and tax assumptions of \$120 and updated mortality assumptions of \$46.

The discount rate for valuing the reinsurance asset was updated in Ireland. This change in accounting estimate increased gross liabilities and reinsurance assets by \$360 and had no impact on net liabilities or net earnings.

Net participating insurance contract liabilities decreased by \$69 in 2016 due to management actions and assumption changes. The decrease was primarily due to higher investment returns of \$59, provisions for future policyholder dividends of \$35, updated expense and tax assumptions of \$12, updated life mortality assumptions of \$2 and updated morbidity assumptions of \$2. This was partially offset by increases due to modeling refinements of \$29 and updated policyholder behaviour assumptions of \$13.

In 2015, the major contributors to the increase in net insurance contract liabilities were the impact of foreign exchange rate changes of \$6,315, business movement from/to external parties of \$1,600, which was primarily due to the acquisition of Equitable Life's annuity business during the first quarter of 2015, and the impact of new business of \$1,400, partially offset by decreases due to the normal changes in the in force business of \$3,151 and management actions and assumption changes of \$451.

Net non-participating insurance contract liabilities decreased by \$447 in 2015 due to management actions and assumption changes. The decrease was primarily due to updated longevity assumptions of \$290, updated economic assumptions of \$188, updated life mortality assumptions of \$109 and updated morbidity assumptions of \$14 and updates to other provisions of \$13. This was partially offset by increases due to updated policyholder behaviour assumptions of \$88, expense and tax assumptions of \$40 and modeling refinements of \$39.

Net participating insurance contract liabilities decreased by \$4 in 2015 due to management actions and assumption changes. The decrease was primarily due to provisions for future policyholder dividends of \$952, updated expense and tax assumptions of \$271 and updated life mortality assumptions of \$235, partially offset by increases due to lower investment returns of \$1,355, modeling refinements of \$92 and updated policyholder behaviour assumptions of \$7.

12. Insurance and Investment Contract Liabilities (cont'd)

(d) Change in investment contract liabilities measured at fair value

	2016			2015 (note 32)		
	Gross liability	Reinsurance assets	Net	Gross liability	Reinsurance assets	Net
Balance, beginning of year	\$ 2,178	\$ 188	\$ 1,990	\$ 839	\$ 177	\$ 662
Normal change in force business	(219)	(26)	(193)	(85)	(29)	(56)
Investment experience	82	6	76	29	8	21
Management action and changes in assumptions	(46)	—	(46)	7	—	7
Business movement from/to external parties	—	—	—	1,330	—	1,330
Impact of foreign exchange rate changes	(70)	(6)	(64)	58	32	26
Balance, end of year	\$ 1,925	\$ 162	\$ 1,763	\$ 2,178	\$ 188	\$ 1,990

The carrying value of investment contract liabilities approximates their fair value.

In 2015, business movement from/to external parties is primarily due to a retrocession agreement to assume a block of investment contract liabilities in the form of structured settlements with fixed terms and amount.

(e) Gross premiums written and gross policyholder benefits**(i) Premium Income**

	2016	2015
Direct premiums	\$ 8,926	\$ 9,295
Assumed reinsurance premiums	11,008	5,784
Total	\$ 19,934	\$ 15,079

(ii) Policyholder Benefits

	2016	2015
Direct	\$ 6,525	\$ 6,553
Assumed reinsurance	11,593	6,695
Total	\$ 18,118	\$ 13,248

(f) Actuarial Assumptions

In the computation of insurance contract liabilities, valuation assumptions have been made regarding rates of mortality/morbidity, investment returns, levels of operating expenses, rates of policy termination and rates of utilization of elective policy options or provisions. The valuation assumptions use best estimates of future experience together with a margin for adverse deviation. These margins are necessary to provide for possibilities of misestimation and/or future deterioration in the best estimate assumptions and provide reasonable assurance that insurance contract liabilities cover a range of possible outcomes. Margins are reviewed periodically for continued appropriateness.

12. Insurance and Investment Contract Liabilities (cont'd)

The methods for arriving at these valuation assumptions are outlined below:

Mortality

A life insurance mortality study is carried out annually for each major block of insurance business. The results of each study are used to update the Company's experience valuation mortality tables for that business. When there is insufficient data, use is made of the latest industry experience to derive an appropriate valuation mortality assumption. Mortality improvement has been projected to occur for the next 25 years. In addition, appropriate provisions have been made for future mortality deterioration on term insurance.

Annuitant mortality is also studied regularly and the results used to modify established industry experience annuitant mortality tables. Mortality improvement has been projected to occur throughout future years for annuitants.

Morbidity

The Company uses industry developed experience tables modified to reflect emerging Company experience. Both claim incidence and termination are monitored regularly and emerging experience is factored into the current valuation.

Investment returns

The assets which correspond to the different liability categories are segmented. For each segment, projected cash flows from the current assets and liabilities are used in Canadian Asset Liability Method to determine insurance contract liabilities. Cash flows from assets are reduced to provide for asset default losses. Testing under several interest rate and equity scenarios (including increasing and decreasing rates) is done to provide for reinvestment risk (note 7(c)).

Expenses

Contractual policy expenses (e.g. sales commissions) and tax expenses are reflected on a best estimate basis. Expense studies for indirect operating expenses are updated regularly to determine an appropriate estimate of future operating expenses for the liability type being valued. Improvements in unit operating expenses are not projected. An inflation assumption is incorporated in the estimate of future operating expenses consistent with the interest rate scenarios projected under Canadian Asset Liability Method as inflation is assumed to be correlated with new money interest rates.

Policy termination

Studies to determine rates of policy termination are updated regularly to form the basis of this estimate. Industry data is also available and is useful where the Company has no experience with specific types of policies or its exposure is limited. The Company has significant exposures in respect of the T-100 and Level Cost of Insurance Universal Life products in Canada and policy renewal rates at the end of term for renewable term policies in Canada and Reinsurance. Industry experience has guided the Company's assumptions for these products as the Company's own experience is very limited.

Utilization of elective policy options

There are a wide range of elective options embedded in the policies issued by the Company. Examples include term renewals, conversion to whole life insurance (term insurance), settlement annuity purchase at guaranteed rates (deposit annuities) and guarantee re-sets (segregated fund maturity guarantees). The assumed rates of utilization are based on Company or industry experience when it exists and when not on judgment considering incentives to utilize the option. Generally, whenever it is clearly in the best interests of an informed policyholder to utilize an option, then it is assumed to be elected.

12. Insurance and Investment Contract Liabilities (cont'd)

Policyholder dividends and adjustable policy features

Future policyholder dividends and other adjustable policy features are included in the determination of insurance contract liabilities with the assumption that policyholder dividends or adjustable benefits will change in the future in response to the relevant experience. The dividend and policy adjustments are determined consistent with policyholders' reasonable expectations, such expectations being influenced by the participating policyholder dividend policies and/or policyholder communications, marketing material and past practice. It is the Company's expectation that changes will occur in policyholder dividend scales or adjustable benefits for participating or adjustable business respectively, corresponding to changes in the best estimate assumptions, resulting in an immaterial net change in insurance contract liabilities. Where underlying guarantees may limit the ability to pass all of this experience back to the policyholder, the impact of this non-adjustability on shareholders' earnings is reflected in the changes in best estimate assumptions above.

(g) Risk management**(i) Insurance risk**

Insurance risk is the risk that the insured event occurs and that there are large deviations between expected and actual actuarial assumptions including mortality, persistency, longevity, morbidity, expense variations and investment returns.

As an insurance company, Canada Life is in the business of accepting risk associated with insurance contract liabilities. The objective of the Company is to mitigate its exposure to risk arising from these contracts through product design, product and geographical diversification, the implementation of the Company's underwriting strategy guidelines, and through the use of reinsurance arrangements.

The following provides information about the Company's insurance contract liabilities sensitivities to management's best estimate of the approximate impact as a result of changes in assumptions used to determine the Company's liability associated with these contracts.

	Increase (decrease) in net earnings	
	2016	2015
Mortality - 2% increase	\$ (199)	\$ (196)
Annuitant mortality - 2% decrease	\$ (373)	\$ (303)
Morbidity - 5% adverse change	\$ (101)	\$ (91)
Investment returns		
Parallel shift in yield curve		
1% increase	\$ —	\$ —
1% decrease	\$ —	\$ —
Change in range of interest rates		
1% increase	\$ 101	\$ 65
1% decrease	\$ (305)	\$ (254)
Change in equity markets		
10% increase	\$ 40	\$ 42
10% decrease	\$ (45)	\$ (69)
Change in best estimate returns for equities		
1% increase	\$ 321	\$ 351
1% decrease	\$ (331)	\$ (352)
Expenses - 5% increase	\$ (74)	\$ (68)
Policy termination and renewal - 10% adverse change	\$ (359)	\$ (364)

12. Insurance and Investment Contract Liabilities (cont'd)

Concentration risk may arise from geographic regions, accumulation of risks and market risk. The concentration of insurance risk before and after reinsurance by geographic region is described below.

	2016			2015 (note 32)		
	Gross liability	Reinsurance assets	Net	Gross liability	Reinsurance assets	Net
Canada	\$ 22,904	\$ 1,635	\$ 21,269	\$ 21,608	\$ 1,443	\$ 20,165
United States	4,522	1,231	3,291	4,825	1,370	3,455
Europe	52,958	6,443	46,515	59,668	5,856	53,812
Total	\$ 80,384	\$ 9,309	\$ 71,075	\$ 86,101	\$ 8,669	\$ 77,432

(ii) Reinsurance risk

Maximum limits per insured life benefit amount (which vary by line of business) are established for life and health insurance, and reinsurance is purchased for amounts in excess of those limits.

Reinsurance costs and recoveries as defined by the reinsurance agreement are reflected in the valuation with these costs and recoveries being appropriately calibrated to the direct assumptions.

Reinsurance contracts do not relieve the Company from its obligations to policyholders. Failure of reinsurers to honour their obligations could result in losses to the Company. The Company evaluates the financial condition of its reinsurers to minimize its exposure to significant losses from reinsurer insolvencies.

Certain of the reinsurance contracts are on a funds withheld basis where the Company retains the assets supporting the reinsured insurance contract liabilities, thus minimizing the exposure to significant losses from reinsurer insolvency on those contracts.

13. Segregated Funds and Other Structured Entities

The Company offers segregated fund products in Canada and Europe that are referred to as segregated funds and unit-linked funds in the respective region. These funds are contracts issued by insurers to segregated fund policyholders where the benefit is directly linked to the performance of the investments, the risks or rewards of the fair value movements and net investment income is realized by the segregated fund policyholders. The segregated fund policyholders are required to select the segregated funds that hold a range of underlying investments. While the Company has legal title to the investments, there is a contractual obligation to pass along the investment results to the segregated fund policyholder and the Company segregates these investments from those of the Company.

In Canada, the segregated fund assets are legally separated from the general assets of the Company under the terms of the policyholder agreement and cannot be used to settle obligations of the Company. In Europe, the assets of the funds are functionally and constructively segregated from those of the Company. As a result of the legal and constructive arrangements of these funds, the assets and liabilities of these funds are presented as line items within the Consolidated Balance Sheets titled investments on account of segregated fund policyholders and with an equal liability titled investment and insurance contracts on account of segregated fund policyholders.

In circumstances where the segregated funds are invested in structured entities and are deemed to control the entity, the Company has presented the non-controlling ownership interest within the segregated funds for the risk of policyholders as equal and offsetting amounts in the assets and liabilities. The amounts presented within are \$1,060 at December 31, 2016 (\$942 at December 31, 2015).

13. Segregated Funds and Other Structured Entities (cont'd)

Within the Consolidated Statements of Earnings, all segregated fund policyholders' income, including fair value changes and net investment income, is credited to the segregated fund policyholders and reflected in the assets and liabilities on account of segregated fund policyholders within the Consolidated Balance Sheets. As these amounts do not directly impact the revenues and expenses of the Company, these amounts are not included separately in the Consolidated Statements of Earnings.

Segregated Funds Guarantee Exposure

The Company offers retail segregated fund products and unitized with profits (UWP) products that provide for certain guarantees that are tied to the market values of the investment funds. While these products are similar to mutual funds, there is a key difference from mutual funds as the segregated funds have certain guarantee features that protect the segregated fund policyholder from market declines in the underlying investments. These guarantees are the Company's primary exposure on these funds. The Company accounts for these guarantees within insurance and investment contract liabilities within the financial statements. In addition to the Company's exposure on the guarantees, the fees earned by the Company on these products are impacted by the market value of these funds.

In Canada, the Company offers retail segregated fund products. These products provide guaranteed minimum death benefits (GMDB) and guaranteed minimum accumulation on maturity benefits.

In Europe, the Company offers UWP products and unit-linked products with investment guarantees through Irish Life. These products are similar to segregated fund products, but include pooling of policyholders' funds and minimum credited interest rates.

The Company also offers a guaranteed minimum withdrawal benefits (GMWB) product in Canada, Ireland and Germany. Certain GMWB products offered by the Company offer levels of death and maturity guarantees. At December 31, 2016, the amount of GMWB product in-force in Canada, Ireland and Germany was \$1,398 (\$1,401 at December 31, 2015).

The following presents further details of the investments, determined in accordance with the relevant statutory reporting requirements of each region of the Company's operations, on account of segregated fund policyholders:

(a) Investments on account of segregated fund policyholders

	2016	2015
Cash and cash equivalents	\$ 10,021	\$ 9,165
Bonds	15,765	16,576
Stocks and units in unit trusts	62,180	63,480
Mutual funds	3,636	3,512
Investment properties	4,035	4,261
	95,637	96,994
Accrued income	207	229
Other assets	269	422
Non-controlling mutual funds interest	1,060	942
Total	\$ 97,173	\$ 98,587

13. Segregated Funds and Other Structured Entities (cont'd)

(b) Investment and insurance contracts on account of segregated fund policyholders

	2016	2015
Balance, beginning of year	\$ 98,587	\$ 82,083
Additions (deductions):		
Policyholder deposits	10,119	9,700
Net investment income	91	6
Net realized capital gains on investments	2,693	2,279
Net unrealized capital gains on investments	3,939	1,112
Unrealized gains (losses) due to changes in foreign exchange rates	(9,544)	7,132
Policyholder withdrawals	(8,995)	(9,442)
Business and other acquisitions	193	5,465
General Fund investment in Segregated Funds	—	(11)
Net transfer to General Fund	(28)	(8)
Non-controlling mutual funds interest	118	271
Total	(1,414)	16,504
Balance, end of year	\$ 97,173	\$ 98,587

(c) Investment income on account of segregated fund policyholders

	2016	2015
Net investment income	\$ 91	\$ 6
Net realized capital gains on investments	2,693	2,279
Net unrealized capital gains on investments	3,939	1,112
Unrealized gains (losses) due to changes in foreign exchange rates	(9,544)	7,132
Total	(2,821)	10,529
Change in investment and insurance contracts liability on account of segregated fund policyholders	(2,821)	10,529
Net	\$ —	\$ —

(d) Investments on account of segregated fund policyholders by fair value hierarchy level (note 8)

	2016			
	Level 1	Level 2	Level 3	Total
Investments on account of segregated fund policyholders⁽¹⁾	\$ 58,999	\$ 32,727	\$ 5,047	\$ 96,773

⁽¹⁾ Excludes other assets, net of other liabilities, of \$400.

	2015			
	Level 1	Level 2	Level 3	Total
Investments on account of segregated fund policyholders ⁽¹⁾	\$ 56,639	\$ 36,332	\$ 5,176	\$ 98,147

⁽¹⁾ Excludes other assets, net of other liabilities, of \$440.

13. Segregated Funds and Other Structured Entities (cont'd)

During 2016, certain foreign stock holdings valued at \$10 have been transferred from Level 2 to Level 1 (\$45 were transferred from Level 1 to Level 2 at December 31, 2015), based on the Company's ability to utilize observable, quoted prices in active markets. Level 2 assets include those assets where fair value is not available from normal market pricing sources and where the Company does not have visibility through to the underlying assets.

As at December 31, 2016, \$639 (\$534 at December 31, 2015) of the segregated funds were invested in funds managed by a related party, Mackenzie Investments, a member of the Power Financial group of companies (note 25).

The following presents additional information about the Company's investments on account of segregated fund policyholders for which the Company has utilized Level 3 inputs to determine fair value:

	2016	2015
Balance, beginning of year	\$ 5,176	\$ 4,161
Total gains (losses) included in segregated fund investment income	(150)	1,055
Purchases	207	528
Sales	(361)	(568)
Transfers into Level 3	175	—
Transfers out of Level 3	—	—
Balance, end of year	\$ 5,047	\$ 5,176

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

In addition to the segregated funds, the Company has interests in number of structured unconsolidated entities including mutual funds, open-ended investment companies and unit trusts. These entities are created as investment strategies for its unit-holders based on the directive of each individual fund.

Some of these funds are managed by related parties of the Company and the Company receives management fees related to these services. Management fees can be variable due to performance of factors – such as markets or industries – in which the fund invests. Fee income derived in connection with the management of investment funds generally increases or decreases in direct relationship with changes of assets under management which is affected by prevailing market conditions, and the inflow and outflow of client assets.

Factors that could cause assets under management and fees to decrease include declines in equity markets, changes in fixed income markets, changes in interest rates and defaults, redemptions and other withdrawals, political and other economic risks, changing investment trends and relative investment performance. The risk is that fees may vary but expenses and recovery of initial expenses are relatively fixed, and market conditions may cause a shift in asset mix potentially resulting in a change in revenue.

During 2016, fee and other income earned by the Company resulting from the Company's interests in these structured entities was \$1,407 (\$1,287 December 31, 2015).

Included within other assets (note 11) at December 31, 2016 \$81 (\$89 December 31, 2015) of investments in stocks of sponsored unit trusts in Europe.

14. Financing Charges

Financing charges consist of the following:

	2016	2015
Interest on long-term debentures	\$ 22	\$ 20
Interest on capital trust securities (note 16)	11	11
Other	6	6
Total	\$ 39	\$ 37

15. Debentures and Other Debt Instruments

	2016		2015	
	Carrying value	Fair value	Carrying value	Fair value
Long-term				
6.40% subordinated debentures due December 11, 2028, unsecured	\$ 100	\$ 128	\$ 100	\$ 127
Subordinated note due September 29, 2026 non-interest bearing, unsecured (note 25)	400	400	400	400
4.68% £32 and £56 promissory notes, matures February 25, 2034, unsecured (note 25)	146	146	180	180
4.35% £13 promissory note, matures May 15, 2029, unsecured (note 25)	22	22	27	27
200 euro subordinated loan, matures December 7, 2031, bearing an interest rate of 2.73% until first par call date of December 7, 2026, and, thereafter, at a rate equal to the five-year euro semi-annual mid-swap rate plus 1.85%, unsecured (note 25) ⁽¹⁾	284	284	—	—
5.25% 200 euro subordinated debentures callable on February 8, 2017, includes associated fixed to floating swap, unsecured	285	277	311	324
Total	\$ 1,237	\$ 1,257	\$ 1,018	\$ 1,058

⁽¹⁾ On December 7, 2016 the Company issued to the parent company a 200 euro, 15 year subordinated loan with an annual interest rate of 2.73% until first par call date of December 7, 2026, and, thereafter at a rate equal to the five-year euro semi-annual mid-swap rate plus 1.85% (note 25).

Subsequent event:

On February 8, 2017 Irish Life Assurance, a subsidiary of the Company, redeemed its 5.25% 200 euro subordinated debenture notes at their principal amount together with accrued interest.

16. Capital Trust Securities

	2016		2015	
	Carrying value	Fair value	Carrying value	Fair value
7.529% due June 30, 2052, unsecured	\$ 150	\$ 212	\$ 150	\$ 215

Canada Life Capital Trust (CLCT), a trust established by Canada Life, had issued \$150 of Canada Life Capital Securities – Series B (CLiCs – Series B), the proceeds of which were used by CLCT to purchase Canada Life senior debentures in the amount of \$150.

Distributions and interest on the capital trust securities are classified as financing charges on the Consolidated Statements of Earnings (note 14). The fair value for capital trust securities is determined by the bid-ask price. Refer to note 7 for financial instrument risk management disclosures.

Subject to regulatory approval, CLCT may redeem the CLiCs – Series B, in whole or in part, at any time.

17. Other Liabilities

	2016	2015
Pension plan and other post-employment benefits (note 23)	\$ 414	\$ 349
Deferred income reserve	309	437
Bank overdraft	126	106
Other	1,129	822
Total	\$ 1,978	\$ 1,714

Total other liabilities of \$1,255 (\$928 at December 31, 2015) are expected to be realized within 12 months from the reporting date. This amount excludes deferred income reserve, the changes in which are noted below.

Deferred income reserve

	2016	2015
Balance, beginning of year	\$ 437	\$ 429
Additions	29	42
Amortization	(39)	(39)
Changes in foreign exchange	(76)	51
Disposals	(42)	(46)
Balance, end of year	\$ 309	\$ 437

18. Participating Account

Net earnings attributable to the participating account recorded in the Consolidated Statements of Earnings are as follows:

	2016	2015
Net earnings attributable to participating account before policyholder dividends	\$ 453	\$ 349
Policyholder dividends	(314)	(301)
Net earnings - participating account	\$ 139	\$ 48

19. Non-Controlling Interests

The Company had a controlling interest in MAM Holdings Inc. at December 31, 2016 and December 31, 2015. The Company's parent, Great-West Life has a non-controlling equity interest in MAM Holdings Inc., an indirectly held subsidiary of the Company, at December 31, 2016 and December 31, 2015. The net earnings attributable to non-controlling interests in the Consolidated Statements of Earnings for the year ended December 31, 2016 was \$9 (\$1 for the year ended December 31, 2015). Non-controlling interests on the Consolidated Balance Sheets for December 31, 2016 was \$90 (\$81 at December 31, 2015).

20. Share Capital

Authorized

Unlimited Class A, Class B, Class C, Class D, Class E, and Class F Preferred Shares

Unlimited Common Shares

Issued and outstanding

	2016		2015	
	Number	Carrying value	Number	Carrying value
Preferred shares				
Class A, Series 1, Non-Cumulative	18,000	\$ —	18,000	\$ —
Class B, Series 1, 7.23% Cumulative	8,000,000	200	8,000,000	200
Total	8,018,000	\$ 200	8,018,000	\$ 200
Common Shares	258,887,312	\$ 2,277	258,887,312	\$ 2,277

The Class A, Series 1 Non-Cumulative Preferred Shares are redeemable at the option of the Company for a price of \$25 per share on or after the date on which there are no CLCT capital trust securities outstanding, subject to regulatory approval.

The Class B, Series 1, 7.23% Cumulative Preferred Shares are redeemable at the option of the Company for \$25 per share together with all unpaid dividends.

In January 2015, the Company issued 1,336,560 common shares for a total value of \$63 to its parent company.

21. Capital Management

(a) Policies and Objectives

Managing capital is the continual process of establishing and maintaining the quantity and quality of capital appropriate for the Company and ensuring capital is deployed in a manner consistent with the expectations of the Company's stakeholders. For these purposes, the Board considers the key stakeholders to be the Company's shareholders, policyholders and holders of subordinated liabilities in addition to the relevant regulators in the various jurisdictions where the Company and its subsidiaries operate.

The Company manages its capital on both a consolidated basis as well as at the individual operating subsidiary level. The primary objectives of the Company's capital management strategy are:

- to maintain the capitalization of its regulated operating subsidiaries at a level that will exceed the relevant minimum regulatory capital requirements in the jurisdictions in which they operate;
- to maintain strong credit and financial strength ratings of the Company ensuring stable access to capital markets; and
- to provide an efficient capital structure to maximize shareholders' value in the context of the Company's operational risks and strategic plans.

The Company has established policies and procedures designed to identify, measure and report all material risks. Management is responsible for establishing capital management procedures for monitoring capital adequacy. The Board of Directors reviews and approves all capital transactions undertaken by management and capital adequacy metrics to ensure it reflects the Company's strategic business plan.

The target level of capitalization for the Company and its subsidiaries is assessed by considering various factors such as the probability of falling below the minimum regulatory capital requirements in the relevant operating jurisdiction, the views expressed by various credit rating agencies that provide financial strength and other ratings to the Company, and the desire to hold sufficient capital to be able to honour all policyholder and other obligations of the Company with a high degree of confidence.

(b) Regulatory Capital

In Canada, OSFI has established a capital adequacy measurement for life insurance companies incorporated under the Insurance Companies Act (Canada) and their subsidiaries, known as the Minimum Continuing Capital and Surplus Requirements. For this purpose, various additions or deductions from capital are mandated by the guidelines issued by OSFI. The following provides a summary of the Minimum Continuing Capital and Surplus Requirements information and ratios for Canada Life:

	2016	2015
Adjusted Net Tier 1 Capital	\$ 8,315	\$ 8,610
Net Tier 2 Capital	2,382	2,039
Total Available Capital	\$ 10,697	\$ 10,649
Total Capital Required	\$ 3,890	\$ 4,090
Tier 1 Ratio	214%	211%
Total Ratio	275%	260%

21. Capital Management (cont'd)

For entities based in Europe, the local solvency capital regime has changed to the Solvency II basis, effective January 1, 2016. During 2016, the Company's regulated European insurance and reinsurance businesses were developing internal risk models and undertook steps to manage the potential capital volatility under the new regulations in cooperation with the European regulators. At the end of 2016 all European regulated entities met all capital and solvency requirements as prescribed under Solvency II.

Other foreign operations and foreign subsidiaries of the Company are required to comply with local capital or solvency requirements in their respective jurisdictions. At December 31, 2016 and December 31, 2015 the Company maintained capital levels above the minimum local regulatory requirements in each of its other foreign operations.

22. Share-Based Payments

- (a) In order to promote a greater alignment of interest between Directors and the policyholders and shareholders of the Company, the Company and certain of its affiliates have established mandatory Deferred Share Unit Plans and/or voluntary Deferred Share Unit Plan (the "Mandatory DSU Plans" and the "Voluntary DSU Plans" respectively) in which the Directors of the Company participate. Under the Mandatory DSU Plans, each Director who is a resident of Canada or the United States is required to receive 50% of his or her annual Board retainer in the form of Deferred Share Units (DSUs). Under the Voluntary DSU Plans, each Director may elect to receive the balance of his or her annual retainer (including Board Committee fees) and attendance fees entirely in the form of DSUs, entirely in cash, or equally in cash and DSUs. In both cases the number of DSUs granted is determined by dividing the amount of remuneration payable to the Director by the weighted average trading price per common share on the Toronto Stock Exchange for the last five trading days of the preceding fiscal quarter (such weighted average trading price being the "value of a Deferred Share Unit"). Directors receive additional DSUs in respect of dividends payable on the common shares of Lifeco based on the value of a Deferred Share Unit at that time. DSUs are generally redeemable at the time that an individual ceases to be a Director by a lump sum cash payment, based on the value of the DSUs on the date of redemption. In 2016, \$3 in directors fees were used to acquire DSUs (\$2 in 2015).
- (b) Certain employees of the Company are entitled to receive Performance Share Units (PSUs). Under these PSU plans, these employees are granted PSUs equivalent to Lifeco's common shares vesting over a three-year period. Employees receive additional PSUs in respect of dividends payable on the common shares of Lifeco based on the value of a PSU at that time. At the maturity date, employees receive cash representing the value of the PSU at this date. The Company uses the fair-value based method to account for the Performance Share Units granted to employees under the plan. For the year-ended December 31, 2016, the Company recognized compensation expense of \$3 (\$1 in 2015) for the PSU plans recorded in operating and administrative expenses on the Consolidated Statements of Earnings. At December 31, 2016, the carrying value of the PSU liability is \$8 (\$5 in 2015) recorded within other liabilities.
- (c) The Company's Employee Share Ownership Plan (ESOP) is a voluntary plan where eligible employees can contribute up to 5% of their previous year's eligible earnings to purchase common shares of Great-West Lifeco Inc. The Company matches 50% of the total employee contributions. The contributions from the Company vest immediately and are expensed. For the year-ended December 31, 2016, the Company recognized compensation expense of \$1 (\$1 in 2015) for the ESOP recorded in operating and administrative expenses on the Consolidated Statements of Earnings.

23. Pension Benefits and Other Post-Employment Benefits

Characteristics, Funding and Risk

The Company and its subsidiaries maintain contributory and non-contributory defined benefit pension plans for certain employees and advisors. The Company and its subsidiaries also maintain defined contribution pension plans for certain employees and advisors.

The defined benefit pension plans provide pensions based on length of service and final average pay. For most plans, active plan participants share in the cost by making contributions in respect of current service. Certain pension payments are indexed either on an ad hoc basis or a guaranteed basis. The determination of the defined benefit obligation reflects pension benefits in accordance with the terms of the plans. The assets supporting the funded pension plans are held in separate trustee pension funds. The obligations for the wholly unfunded plans are included in other liabilities and are supported by general assets.

The significant defined benefit plans of the Company and its subsidiaries are closed to new entrants. New hires are eligible only for defined contribution benefits. The Company's defined benefit plan exposure will continue to be reduced in future years.

The defined contribution pension plans provide pension benefits based on accumulated employee and company contributions. Company contributions to these plans are a set percentage of employees' annual income and may be subject to certain vesting requirements.

The Company and its subsidiaries also provide post-employment health, dental and life insurance benefits to eligible employees, advisors and their dependents. Retirees share in the cost of benefits through deductibles, co-insurance and caps on benefits. These plans are closed to new hires and were previously amended to limit which employees could become eligible to receive benefits. The amount of some of the post-employment benefits other than pensions depends on future cost escalation. These post-employment benefits are not pre-funded and the amount of the obligation for these benefits is included in other liabilities and is supported by general assets.

The Company and its subsidiaries have pension and benefit committees or a trustee arrangement that provides oversight for the benefit plans of the Company. The benefit plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and funding requirements of the Company. Significant changes to the company's benefit plans require approval from that Company's Board of Directors.

The Company and its subsidiaries' funding policy for the funded pension plans is to make contributions equal to or greater than those required by the applicable regulations and plan provisions that govern the funding of the plans. Where funded plans have a net defined benefit pension plan asset, the Company determines if an economic benefit exists in the form of potential reductions in future contributions by the Company, the present value of future expenses to be paid from the plan and in the form of surplus refunds, where permitted by applicable regulation and plan provisions.

By their design, the defined benefit plans expose the Company to the typical risks faced by defined benefit plans such as investment performance, changes to the discount rates used to value the obligations, longevity of plan members, and future inflation. Pension and benefit risk is managed by regular monitoring of the plans, applicable regulations and other factors that could impact the expenses and cash flows of the Company.

23. Pension Benefits and Other Post-Employment Benefits (cont'd)

The following reflects the financial position of the Company and its subsidiaries contributory and non-contributory defined benefit plans:

(a) Plan Assets, Benefit Obligation and Funded Status

	Defined benefit pension plans		Other post- employment benefits	
	2016	2015	2016	2015
Change in fair value of plan assets				
Fair value of plan assets, beginning of year	\$ 3,661	\$ 3,335	\$ —	\$ —
Interest income	122	106	—	—
Actual return over interest income	163	74	—	—

23. Pension Benefits and Other Post-Employment Benefits (cont'd)

Under International Financial Reporting Interpretations Committee (IFRIC) 14, *The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction*, the Company must assess whether each pension plan's asset has economic benefit to the Company through future contribution reductions, the present value of future expenses to be paid from the plan, or surplus refunds; in the event the Company is not entitled to a benefit a limit or 'asset ceiling' is required on the balance. The following table provides a breakdown of the changes in the asset ceiling:

	Defined benefit pension plans	
	2016	2015
Change in asset ceiling		
Asset ceiling, beginning of year	\$ 83	\$ 23
Interest on beginning of period asset ceiling	3	4
Change in asset ceiling	5	56
Asset ceiling, end of year	\$ 91	\$ 83

(b) Pension and Other Post-Employment Benefits Expense

The total pension and other post-employment benefit expense included in operating expenses and other comprehensive income are as follows:

	All pension plans		Other post-employment benefits	
	2016	2015	2016	2015
Defined benefit current service cost	\$ 68	\$ 75	\$ —	\$ —
Defined contribution current service cost	20	12	—	—
Employee contributions	(8)	(9)	—	—
Employer current service cost	80	78	—	—
Administrative expense	7	3	—	—
Plan amendments	—	1	—	—
Curtailments	(14)	—	—	—
Net interest cost	(3)	2	3	4
Expense - profit or loss	70	84	3	4
Actuarial (gain) loss recognized	315	(73)	1	(3)
Return on assets greater than assumed	(163)	(72)	—	—
Change in the asset ceiling	5	56	—	—
Re-measurements - other comprehensive (income) loss	157	(89)	1	(3)
Total expense (income) including re-measurements	\$ 227	\$ (5)	\$ 4	\$ 1

23. Pension Benefits and Other Post-Employment Benefits (cont'd)

(c) Asset Allocation by Major Category Weighted by Plan Assets

	Defined benefit pension plans	
	2016	2015
Equity securities	44%	46%
Debt securities	41%	37%
Real estate	7%	5%
Cash and cash equivalents	8%	12%
Total	100%	100%

No plan assets are directly invested in the Company's or related parties' securities. Plan assets include investments in segregated funds and other funds managed by subsidiaries of the Company of \$3,342 at December 31, 2016 and \$3,365 at December 31, 2015, of which \$3,277 (\$3,301 at December 31, 2015) are included in the Consolidated Balance Sheets. Plan assets do not include any property occupied or other assets used by the Company.

(d) Details of Defined Benefit Obligation**(i) Portion of Defined Benefit Obligation Subject to Future Salary Increases**

	Defined benefit pension plans		Other post-employment benefits	
	2016	2015	2016	2015
Benefit obligation without future salary increases	\$ 3,324	\$ 3,158	\$ 86	\$ 87
Effect of assumed future salary increases	400	432	—	—
Defined benefit obligation	\$ 3,724	\$ 3,590	\$ 86	\$ 87

The other post-employment benefits are not subject to future salary increases.

(ii) Portion of Defined Benefit Obligation Without Future Pension Increases

	Defined benefit pension plans		Other post-employment benefits	
	2016	2015	2016	2015
Benefit obligation without future pension increases	\$ 3,297	\$ 3,016	\$ 86	\$ 87
Effect of assumed future pension increases	427	574	—	—
Defined benefit obligation	\$ 3,724	\$ 3,590	\$ 86	\$ 87

The other post-employment benefits are not subject to future pension increases.

23. Pension Benefits and Other Post-Employment Benefits (cont'd)

(iii) Maturity Profile and Plan Membership

	Defined benefit pension plans		Other post-employment benefits	
	2016	2015	2016	2015
Actives	37%	41%	10%	10%
Deferred vesteds	27%	21%	—%	—%
Retirees	36%	38%	90%	90%
Total	100%	100%	100%	100%
Weighted average duration of defined benefit obligation	22.0 years	21.6 years	11.7 years	11.2 years

(e) Cash Flow Information

	Pension plans	Other post-employment benefits	Total
Expected employer contributions for 2017:			
Funded (wholly or partly) defined benefit plans	\$ 63	\$ —	\$ 63
Unfunded plans	4	5	9
Defined contribution plans	21	—	21
Total	\$ 88	\$ 5	\$ 93

(f) Actuarial Assumptions and Sensitivities

(i) Actuarial Assumptions

	Defined benefit pension plans		Other post-employment benefits	
	2016	2015	2016	2015
To determine benefit cost:				
Discount rate - past service liabilities	3.4%	3.1%	4.0%	3.8%
Discount rate - future service liabilities	3.2%	3.0%	4.3%	4.2%
Rate of compensation increase	2.9%	2.9%	—	—
Future pension increases ⁽¹⁾	1.5%	1.1%	—	—
To determine defined benefit obligation:				
Discount rate - past service liabilities	2.7%	3.4%	3.8%	4.0%
Rate of compensation increase	2.9%	2.9%	—	—
Future pension increases ⁽¹⁾	1.1%	1.5%	—	—
Medical cost trend rates:				
Initial medical cost trend rate			5.0%	5.1%
Ultimate medical cost trend rate			4.5%	4.5%
Year ultimate trend rate is reached			2029	2029

⁽¹⁾ Represents the weighted average of plans subject to future pension increases.

23. Pension Benefits and Other Post-Employment Benefits (cont'd)

(ii) Sample Life Expectancies Based on Mortality Assumptions

	Defined benefit pension plans		Other post-employment benefits	
	2016	2015	2016	2015
Sample life expectancies based on mortality assumption:				
Male				
Age 65 in fiscal year	23.7	23.7	22.4	22.3
Age 65 for those age 35 in the fiscal year	26.3	26.4	24.0	23.9
Female				
Age 65 in fiscal year	25.1	25.2	24.8	24.8
Age 65 for those age 35 in the fiscal year	27.5	27.7	26.2	26.2

The period of time over which benefits are assumed to be paid is based on best estimates of future mortality, including allowances for mortality improvements. This estimate is subject to considerable uncertainty, and judgment is required in establishing this assumption. As mortality assumptions are significant in measuring the defined benefit obligation, the mortality assumptions applied by the Company take into consideration such factors as age, gender and geographic location, in addition to an estimation of future improvements in longevity.

The mortality tables are reviewed at least annually, and assumptions are in accordance with accepted actuarial practice. Emerging plan experience is reviewed and considered in establishing the best estimate for future mortality.

The calculation of the defined benefit obligation is sensitive to the mortality assumptions. The effect of a one-year increase in life expectancy would be an increase in the defined benefit obligation of \$114 for the defined benefit pension plans and \$4 for other post-employment benefits.

(iii) Impact of Changes to Assumptions on Defined Benefit Obligations

	1% increase		1% decrease	
	2016	2015	2016	2015
Defined benefit pension plans:				
Impact of a change to the discount rate	\$ (703)	\$ (626)	\$ 903	\$ 846
Impact of a change to the rate of compensation increase	186	211	(164)	(184)
Impact of a change to the rate of inflation	458	471	(417)	(466)
Other post-employment benefits:				
Impact of a change to assumed medical cost trend rates	5	5	(4)	(4)
Impact of a change to the discount rate	(9)	(9)	11	10

To measure the impact of a change in an assumption, all other assumptions were held constant. It is expected that there would be interaction between at least some of the assumptions.

24. Accumulated Other Comprehensive Income

2016						
	Unrealized foreign exchange gains on translation of foreign operations	Unrealized gains (losses) on available-for-sale assets	Re-measurements on defined benefit pension and other post-employment benefit plans	Total	Participating account	Shareholder

	913	(77)	81	917	7	910
Balance, end of year	\$ 1,294	\$ 53	\$ (92)	\$ 1,255	\$ 11	\$ 1,244

25. Related Party Transactions

Great-West Lifeco Inc. controls the Great-West Life Assurance Company which is the parent of Canada Life Financial Corporation, the direct parent of the Company. As such, the Company is related to Great-West Lifeco Inc. and its other major operating subsidiaries including London Life Insurance Company, Great-West Life & Annuity Insurance Company and Putnam Investments, LLC. In addition, Great-West Lifeco Inc. is a member of the Power Financial group of companies. Through this relationship, the Company is also related to the Power Financial group which includes IGM Financial, a company in the financial services sector along with its subsidiaries Investors Group, Mackenzie Financial and Investment Planning Council and Pargesa, a holding company with substantial holdings in a diversified industrial group based in Europe.

25. Related Party Transactions (cont'd)

(a) Principal Subsidiaries

The financial statements of the Company include the operations of the following subsidiaries and their subsidiaries:

Company	Incorporated in	Primary business operation	% Held
The Canada Life Group (U.K.) Limited	U.K.	Insurance and wealth management	100.00%
Canada Life Limited	U.K.	Insurance and wealth management	100.00%
Irish Life Group Limited	Ireland	Insurance and wealth management	100.00%

(b) Transactions with related parties included in the consolidated financial statementsIssue of Common Shares to Parent Company

On January 1, 2015, a subsidiary of the Company acquired an affiliate, London Life & General Reinsurance Company, for consideration of \$63. The Company and the affiliate are both subsidiaries of Great-West Life. The difference between the consideration of \$63 and the carrying value of the subsidiary upon transfer was recorded as a \$3 increase to shareholder accumulated surplus. The reorganization of its European operations was completed as part of the Company's planning for Solvency II regulations.

Reinsurance Transactions

During 2016, the Company entered into agreements with a subsidiary of London Reinsurance Group Inc. (LRG), an affiliate company, to retrocede certain life business. In 2016, for the Consolidated Statements of Earnings, these transactions resulted in a decrease in premium income of \$4,142 and total paid or credited to policyholders of \$4,127. The transactions were at market terms and conditions.

During 2015, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to retrocede certain life business. In 2016, for the Consolidated Statements of Earnings, these transactions resulted in a decrease in premium income of \$55 (\$56 in 2015) and total paid or credited to policyholders of \$56 (\$57 in 2015). The transactions were at market terms and conditions.

During 2015, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to retrocede certain life business. In 2016, for the Consolidated Statements of Earnings, these transactions resulted in a decrease in premium income of \$74 (\$40 in 2015) and total paid or credited to policyholders of \$73 (\$40 in 2015). The transactions were at market terms and conditions.

During 2014, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to reinsure certain business. In 2016, for the Consolidated Statements of Earnings, these transactions resulted in a decrease in premium income of \$3,173 (\$2,898 in 2015) and total paid or credited to policyholders of \$3,156 (\$2,882 in 2015). The transactions were at market terms and conditions.

During 2014, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to cede certain life business. In 2016, for the Consolidated Statements of Earnings, these transactions resulted in a decrease in premium income of \$66 (\$21 in 2015) and total paid or credited to policyholders of \$61 (\$20 in 2015). The transactions were at market terms and conditions.

During 2013, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to retrocede certain health business. In 2016, for the Consolidated Statement of Earnings, these transactions resulted in a decrease in premium income of \$761 (\$460 in 2015) and total paid or credited to policyholders of \$794 (\$496 in 2015). The transactions were at market terms and conditions.

During 2012, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to retrocede certain life and health business. In 2016, for the Consolidated Statement of Earnings, these transaction resulted in a decrease in premium income of \$61 (\$64 in 2015) and policyholder benefits of \$60 (\$63 in 2015). The transactions were at market terms and conditions.

25. Related Party Transactions (cont'd)

During 2012, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to cede certain life business. In 2016, for the Consolidated Statements of Earnings, these transactions resulted in a decrease in premiums of \$128 (\$140 in 2015) and total paid or credited to policyholders of \$125 (\$136 in 2015). The transactions were at market terms and conditions.

During 2012, the Company entered into agreements with a branch of London Life Insurance Company, an affiliate company, to retrocede certain U.S. life and annuity business on a modified coinsurance basis. In 2016, for the Consolidated Statement of Earnings, these transactions resulted in a decrease in premium income of \$73 (\$73 in 2015) and total paid or credited to policyholders of \$61 (\$53 in 2015). The transactions were at market terms and conditions.

During 2011, the Company entered into agreements with a subsidiary of LRG, an affiliate company, to retrocede certain life and health business. In 2016, for the Consolidated Statement of Earnings, these transactions resulted in a decrease in premium income of \$536 (\$459 in 2015) and total paid or credited to policyholders of \$532 (\$454 in 2015). The transactions were at market terms and conditions.

Effective April 1, 2007, The Canada Life Insurance Company of Canada (CLICC) and Great-West Life entered into an Indemnity Reinsurance Agreement pursuant to which CLICC assumed liabilities by coinsurance including certain blocks of non-participating group life and health insurance policies, non-participating individual life reinsurance, non-participating group payout annuities and non-participating individual payout annuities. In 2016, for the Consolidated Statements of Earnings, this transaction resulted in an increase of premium income of \$566 (\$500 in 2015) and total paid or credited to policyholders of \$744 (\$493 in 2015). The transaction was at market terms and conditions.

During 2005, Great-West Life & Annuity Insurance Company of South Carolina (GWSC), an affiliated company, assumed on a coinsurance basis with funds withheld, certain of Canada Life's U.S. term life reinsurance business. During 2007, an additional amount of U.S. term life reinsurance business was retroceded by Canada Life to GWSC. In 2016, for the Consolidated Statements of Earnings, these transactions resulted in a reduction in premium income of \$112 (\$108 in 2015) and total paid or credited to policyholders of \$53 (\$114 in 2015). The transactions were at market terms and conditions.

Other Related Party Transactions

In the normal course of business, the Company provided insurance benefits to other companies within the Power Financial group of companies. In all cases, transactions were at market terms and conditions.

Segregated funds of the Company were invested in funds managed by Mackenzie Investments. The Company also has interests in mutual funds, open-ended investment companies and unit trusts. Some of these funds are managed by related parties of the Company and the Company receives management fees related to these services. All transactions were provided at market terms and conditions (note 13).

During the year, the Company received from IGM and its subsidiaries (IGM), certain administrative services. The Company paid \$90 in commissions (\$61 in 2015) under an agreement with IGM for distribution services. As well, certain administrative services were provided to and received from Great-West Life and London Life. The Company paid \$1 (\$1 in 2015) for property management and leasing services from GWL Realty Advisors Inc., a wholly owned subsidiary of Great-West Life. During 2016, the Company was appointed as sub-advisor to Great-West Funds, Inc. and Great-West Capital Management, LLC, affiliated companies, to act as an investment advisor to a series of Great-West Funds. All services were provided on market terms and conditions.

During 2016, the Company purchased residential mortgages of \$135 (\$105 in 2015) from London Life. The Company sold residential mortgages of \$10 (\$10 in 2015) to London Life. The Company purchased bonds of \$56 (\$50 in 2015) from Great-West Life and of \$5 (\$65 in 2015) from London Life. The Company sold bonds of nil to Great-West Life (\$90 in 2015) and of \$122 (\$38 in 2015) to London Life. The above transactions were at market terms and conditions.

*25. Related Party Transactions (cont'd)*Other Related Party Balances

On December 7, 2016 the Company issued to its parent a 200 euro (\$284), 15 year subordinated loan with an annual interest rate of 2.73% until first par call date of December 7, 2026, and, thereafter at a rate equal to the five-year euro semi-annual mid-swap rate plus 1.85% (note 15).

The Company has promissory notes denominated in pounds of £32 (\$53) and £56 (\$93) payable to the London Life and with Great-West Life, respectively. The promissory notes mature on February 25, 2034 and bear interest at 4.68% (note 15). During 2016, interest expense of \$7 (\$8 in 2015) is included in the Consolidated Statements of Earnings.

The Company has a promissory note payable denominated in pounds of £13 with London Life. The promissory note bears interest at 4.35% and matures on May 15, 2029 (note 15). During 2016, interest expense of \$1 (\$1 in 2015) is included in the Consolidated Statements of Earnings.

At December 31, 2016, the Company had a temporary outstanding balance of \$107 (\$91 in 2015) payable to Great-West Life and \$66 (\$56 in 2015) payable to London Life in respect of administrative services provided. These amounts are included in other liabilities and were at market terms and conditions.

The Company has a \$200 principal amount note receivable to Great-West Life, with an interest rate of 7.08%. Interest income of \$14 (\$14 in 2015) is included in the Consolidated Statements of Earnings.

The Company has interest bearing notes receivable from Great-West Life, which have an outstanding balance of \$400 (\$400 in 2015). The loan is repayable on demand and bears interest at a rate of 0.25%. Interest income of \$1 is included in the Consolidated Statements of Earnings (\$1 in 2015).

The Company has interest bearing loan payable to LRG of U.S. \$111 (\$149). The loan is repayable on demand and bears interest at a rate of the London Interbank Offered Rate plus 1.25%. During 2016, interest expense of \$3 (\$2 in 2015) is included in the Consolidated Statements of Earnings.

The Company has non-interest bearing debentures from London Life, which has an outstanding balance of \$400 in 2016 and 2015 (note 15).

The Company has notes payable to Great-West Life which have an outstanding balance of \$96 (\$96 in 2015). These notes are non-interest bearing.

At December 31, 2016 the Company held \$23 (\$23 in 2015) of debentures issued by IGM.

The Company has an non-interest bearing note receivable from Great-West Life which has an outstanding balance of \$300 (\$300 in 2015).

The Company has an non-interest bearing note receivable from Great-West Life which has an outstanding balance of \$193 (\$196 in 2015), due September 21, 2039.

The Company has notes receivable from GWL THL Private Equity 1 Inc., a subsidiary of Great-West Life, which have an outstanding balance of \$110 (\$111 in 2015).

25. Related Party Transactions (cont'd)

(c) Key management compensation

Key management personnel constitutes those individuals that have the authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any Director. The individuals that comprise the key management personnel are the Board of Directors as well as certain key management and officers. The key management personnel are defined at Great-West Life.

The following describes all compensation paid to, awarded to, or earned by each of the key management personnel for services rendered in all capacities to the Company and its subsidiaries:

	2016	2015
Salary	\$ 13	\$ 12
Share-based awards	6	5
Option-based awards	3	5
Annual non-equity incentive plan compensation	8	7
Pension value	7	8
Total	\$ 37	\$ 37

26. Income Taxes

(a) Components of the income tax expense

(i) Income tax recognized in Consolidated Statements of Earnings

Current income tax

	2016	2015
Total current year income tax	\$ 204	\$ 140

Deferred income tax

Origination and reversal of temporary differences	\$ 54	\$ 43
Effect of changes in tax rates or imposition of new taxes	—	1
Write-down or reversal of previous write-down of deferred tax assets	5	—
Previously unrecognized tax loss, tax credit or temporary difference of prior year	—	(5)
Total deferred income tax	\$ 59	\$ 39
Total income tax expense	\$ 263	\$ 179

(ii) Income tax recognized in other comprehensive income (note 24)

	2016	2015
Current income tax expense (recovery)	\$ 1	\$ (5)
Deferred income tax expense (recovery)	(30)	4
Total	\$ (29)	\$ (1)

26. Income Taxes (cont'd)

- (b) The effective income tax rate reported in the Consolidated Statements of Earnings varies from the combined Canadian federal and provincial income rate of 26.75% the following items:

	2016		2015	
Earnings before income taxes	\$	1,963	\$	1,834
Combined basic Canadian federal and provincial tax rate		525 26.75%		490 26.75%
Increase (decrease) in the income tax rate resulting from:				
Non-taxable investment income		(48) (2.45)		(67) (3.68)
Lower effective tax rates on income not subject to tax in Canada		(205) (10.44)		(231) (12.60)
Other		3 0.15		(13) (0.72)
Impact of rate changes on deferred income taxes		(12) (0.61)		— —
Total income tax expense and effective income tax rate	\$	263 13.40%	\$	179 9.75%

- (c) Composition and changes in net deferred income tax liabilities are as follows:

	2016					
	Insurance and investment contract liabilities	Portfolio investments	Losses carried forward	Intangible assets	Other	Total
Balance, beginning of year	\$ 150	\$ (212)	\$ 26	\$ (36)	\$ (268)	\$ (340)
Recognized in Statements of Earnings	(27)	3	(6)	—	(29)	(59)
Recognized in Statements of Comprehensive income	—	(9)	—	—	39	30
Acquired in business combinations	—	—	5	(9)	—	(4)
Foreign exchange rate changes and other	(1)	3	(1)	2	15	18
Balance, end of year	\$ 122	\$ (215)	\$ 24	\$ (43)	\$ (243)	\$ (355)

	2015 (note 32)					
	Insurance and investment contract liabilities	Portfolio investments	Losses carried forward	Intangible assets	Other	Total
Balance, beginning of year	\$ 213	\$ (279)	\$ 26	\$ (29)	\$ (204)	\$ (273)
Recognized in Statements of Earnings	(76)	68	(7)	(5)	(19)	(39)
Recognized in Statements of Comprehensive income	—	8	—	—	(12)	(4)
Foreign exchange rate changes and other	13	(9)	7	(2)	(33)	(24)
Balance, end of year	\$ 150	\$ (212)	\$ 26	\$ (36)	\$ (268)	\$ (340)

26. Income Taxes (cont'd)

Recorded on Consolidated Balance Sheets:

	2016	2015
		(note 32)
Deferred tax assets	\$ 125	\$ 167
Deferred tax liabilities	(480)	(507)
Total	\$ (355)	\$ (340)

A deferred income tax asset is recognized for deductible temporary differences and unused losses and carryforwards only to the extent that realization of the related income tax benefit through future taxable profits is probable.

Recognition is based on the fact that it is probable that the entity will have taxable profits and/or tax planning opportunities available to allow the deferred income tax asset to be utilized. Changes in circumstances in future periods may adversely impact the assessment of the recoverability. The uncertainty of the recoverability is taken into account in establishing the deferred income tax assets. The Company's annual financial planning process provides a significant basis for the measurement of deferred income tax assets.

Management assesses the recoverability of the deferred income tax assets carrying values based on future years' taxable income projections and believes the carrying values of the deferred income tax assets as of December 31, 2016 are recoverable.

At December 31, 2016, the Company has recognized a deferred tax asset of \$24 (\$26 at December 31, 2015) on tax loss carryforwards totaling \$147 (\$167 in 2015). Of this amount, \$30 expire between 2017 and 2036, while \$117 have no expiry date. The Company will realize this benefit in future years through a reduction in current income taxes payable.

The Company has not recognized a deferred tax asset of \$23 (\$27 in 2015) on tax loss carryforwards totaling \$101 (\$123 in 2015) that have no expiry date.

A deferred income tax liability has not been recognized in respect of the temporary differences associated with investments in subsidiaries, branches and associates as the Company is able to control the timing of the reversal of the temporary differences, and it is probable that the temporary differences will not reverse in the foreseeable future.

27. Operating and Administrative Expenses

	2016	2015
Salaries and other employee benefits	\$ 687	\$ 642
General and administrative	491	422
Amortization of fixed assets	24	28
Total	\$ 1,202	\$ 1,092

28. Derivative Financial Investments

In the normal course of managing exposure to fluctuations in interest and foreign exchange rates, and to market risks, the Company is an end-user of various derivative financial instruments. It is the Company's policy to transact in derivatives only with the most creditworthy financial intermediaries. Note 7 illustrates the credit quality of the Company's exposure to counterparties. Credit risk equivalent amounts are presented net of collateral received, including initial margin on exchange-traded derivatives of \$6 as at December 31, 2016 (\$81 at December 31, 2015).

(a) The following summarizes the Company's derivative portfolio and related credit exposure using the following definitions of risk as prescribed by OSFI:

Maximum Credit Risk	The total replacement cost of all derivative contracts with positive values.
Future Credit Exposure	The potential future credit exposure is calculated based on a formula prescribed by OSFI. The factors prescribed by OSFI for this calculation are based on derivative type and duration.
Credit Risk Equivalent	The sum of maximum credit risk and the potential future credit exposure less any collateral held.
Risk Weighted Equivalent	Represents the credit risk equivalent, weighted according to the creditworthiness of the counterparty, as prescribed by OSFI.

	2016				
	Notional amount	Maximum credit risk	Future credit exposure	Credit risk equivalent	Risk weighted equivalent
Interest rate contracts					
Swaps	\$ 904	\$ 73	\$ 8	\$ 80	\$ 5

Foreign exchange forward contracts	—	553	—	553	80
Total	\$ 1,251	\$ 2,561	\$ 3,838	\$ 7,650	\$ (965)

Futures contracts included in the above are exchange traded contracts; all other contracts are over the counter.

(c) Interest Rate Contracts

Interest rate swaps, futures and options are used as part of a portfolio of assets to manage interest rate risk associated with investment activities and insurance and investment contract liabilities. Interest-rate swap agreements require the periodic exchange of payments without the exchange of the notional principal amount on which payments are based. Call options grant the Company the right to enter into a swap with predetermined fixed-rate payments over a predetermined time period on the exercise date. Call options are used to manage the variability in future interest payments due to a change in credited interest rates and the related potential change in cash flows due to surrenders. Call options are also used to hedge minimum rate guarantees.

Foreign Exchange Contracts

Cross-currency swaps are used in combination with other investments to manage foreign currency risk associated with investment activities, and insurance and investment contract liabilities. Under these swaps principal amounts and fixed or floating interest payments may be exchanged in different currencies. The Company also enters into certain foreign exchange forward contracts to hedge certain product liabilities.

Other Derivative Contracts

Equity index swaps, futures and options are used to hedge certain product liabilities. Equity index swaps are also used as substitutes for cash instruments and are used to periodically hedge the market risk associated with certain fee income. Equity put options are used to manage potential credit risk impact of significant declines in certain equity markets.

29. Legal Provisions and Contingent Liabilities

The Company and its subsidiaries are from time to time subject to legal actions, including arbitrations and class actions, arising in the normal course of business. It is inherently difficult to predict the outcome of any of these proceedings with certainty, and it is possible that an adverse resolution could have a material adverse effect on the consolidated financial position of the Company. However, based on information presently known, it is not expected that any of the existing legal actions, either individually or in the aggregate, will have a material adverse effect on the consolidated financial position of the Company. Actual results could differ from management's best estimates.

During the year, the Company received the required regulatory approvals and is now in the final stages of implementing the settlement of the class action related to the four partial declared wind-ups in respect of an Ontario defined benefit pension plan.

30. Commitments**(a) Letters of Credit**

Letters of credit are written commitments provided by a bank. Great-West Life has entered into certain letters of credit facilities which are available to certain of the Company's subsidiaries under various reimbursement agreements. The letter of credit's issued under these arrangements total U.S. \$141.

Additionally, the Company and its subsidiaries have letters of credit facilities directly available totaling U.S. \$500 and £117. Amounts issued under these facilities total U.S. \$500 and £117 respectively.

The Reinsurance operation periodically uses letters of credit as collateral under certain reinsurance contracts for on balance sheet policy liabilities.

(b) Investment Commitments

Commitments of investment transactions made in the normal course of operations in accordance with policies and guidelines that are to be disbursed upon fulfillment of certain contract conditions were \$266 as at December 31, 2016, with \$178 maturing within one year and \$88 maturing within two years.

(c) Lease Obligations

The Company enters into operating leases for office space and certain equipment used in the normal course of operations. Lease payments are charged to operations over the period of use. The future minimum lease payments in aggregate and by year are as follows:

	2017	2018	2019	2020	2021	2022 and thereafter	Total
Future lease payments	\$ 11	10	9	7	7	13	\$ 57

30. *Commitments (cont'd)*

(d) Pledged Assets

In addition to the assets pledged by the Company disclosed elsewhere in the financial statements:

- (i) The amount of assets included in the Company's balance sheet which have a security interest by way of pledging is \$1,709 (\$645 at December 31, 2015) in respect of reinsurance agreements.

In addition, under certain reinsurance contracts, bonds presented in portfolio investments are held in trust and escrow accounts. Assets are placed in these accounts pursuant to the requirements of certain legal and contractual obligations to support contract liabilities assumed.

- (ii) The Company has pledged, in the normal course of business, \$32 (\$30 at December 31, 2015) of assets of the Company for the purpose of providing collateral for the counterparty.

31. Segmented Information

The major operating segments of the Company are the participating and shareholder operations. Within these segments the major business units are: Individual Insurance, Wealth Management, Group Insurance, Europe/Reinsurance, United States and Corporate. These business units reflect the Company's management structure and internal financial reporting. Each of these segments operates in the financial services industry and the revenues from these business units are derived principally from life, health and disability insurance, annuity products, creditor and direct marketing, savings products and life, accident and health reinsurance. Business activities and operations that are not associated with the specific business units are attributed to Corporate.

32. Comparative Figures

The Company corrected the classification of \$73 of deferred tax liabilities to investment contract liabilities to conform to the current year presentation (notes 8, 12 and 26). The Company also reclassified comparative figures for certain disclosure items.

This adjustment and reclassification had no impact on the total equity or net earnings of the Company.

INDEPENDENT AUDITOR'S REPORT

To the Policyholders and the Shareholder of The Canada Life Assurance Company

We have audited the accompanying consolidated financial statements of The Canada Life Assurance Company, which comprise the consolidated balance sheets as at December 31, 2016 and December 31, 2015, and the consolidated statements of earnings, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of The Canada Life Assurance Company as at December 31, 2016 and December 31, 2015, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

APPOINTED ACTUARY'S REPORT

To the Policyholders, Shareholder and Directors of The Canada Life Assurance Company

I have valued the policy liabilities and reinsurance assets of The Canada Life Assurance Company for its consolidated balance sheet at December 31, 2016 and their changes in the consolidated statement of earnings for the year then ended in accordance with accepted actuarial practice in Canada, including selection of appropriate assumptions and methods.

In my opinion, the amount of policy liabilities net of reinsurance assets makes appropriate provision for all policy obligations and the consolidated financial statements fairly present the results of the valuation.

Tyrone G. Faulds

Fellow, Canadian Institute of Actuaries

PARTICIPATING POLICYHOLDER DIVIDEND POLICY

This Policyholder Dividend Policy, in conjunction with the Participating Account Management Policy, has been established by the Board of Directors and applies to all participating insurance policies issued or assumed by the Company. The Board of Directors may amend this policy from time to time at its discretion. The factors most likely to be considered in deciding whether to amend this policy include changes in applicable legal or regulatory requirements, professional guidelines, industry practices or significant business changes. The Appointed Actuary has overall accountability for the administration of this policy.

Earnings are generated in the participating account when the experience in the participating account for factors such as investment income, mortality, lapses, expenses and taxes is collectively more favourable than the assumptions for these factors used when pricing the participating insurance policies. The Company may distribute a portion of the earnings at the discretion of the Board of Directors in accordance with this policy.

Participating insurance policies are eligible for periodic policyholder dividends. Policyholder dividends are not guaranteed. The amount to be distributed from the participating account as policyholder dividends is determined at least annually following a review of the experience and trends in experience. Experience in a given year may be amortized into the dividend scale to avoid undue fluctuations in dividends. The amount distributed is also influenced by considerations such as the need to retain earnings as surplus as described in the Participating Account Management Policy.

The amount distributed as policyholder dividends is divided among classes of policies by setting the policyholder dividend scale. These dividend classes are groupings of participating policies with certain product and policy attributes in common.

The Company follows the contribution principle when setting the policyholder dividend scale. This means the amount distributed as policyholder dividends is divided among dividend classes in proportion to the amount that those classes are considered to have contributed to the participating account earnings. A contribution to earnings will be made from a particular dividend class to the extent the experience for that particular class is different from the assumptions used when pricing that class of policies. When applying the contribution principle, attention is paid to achieving reasonable equity between dividend classes and between generations of policies within a dividend class, taking into account practical considerations and limits, legal and regulatory requirements, professional guidelines and industry practices. For certain blocks of policies, the policyholder dividend scale may be determined using methods designed to approximate the contribution to earnings of those blocks.

The policyholder dividends are credited according to the terms of each policy. A change made by a policyholder to a policy after it is issued may, in some cases, result in a change to the policy's dividend class and thus a change to the amount of policyholder dividends credited thereafter.

In addition to periodic policyholder dividends, dividends may be payable on some policies when terminated through death, surrender or maturity. The amount of any such dividends may take into consideration such factors as the type of policy, the length of time the policy has been in force and when the policy was issued.

The Company maintains separate sub-accounts for certain specific closed blocks of participating life insurance policies in many of the jurisdictions in which it operates. The closed block sub-accounts are within the Company's participating account and managed according to the operating rules established for the closed blocks. Each closed block sub-account is managed separately to distribute over time the full amount of its earnings to the participating policyholders of that closed block through policyholder dividends.

Prior to the declaration of policyholder dividends by the Board, the Appointed Actuary reports to the Board of Directors with his opinion on the fairness to participating policyholders of the proposed policyholder dividends and on their compliance with this policy, applicable legislative and regulatory requirements and applicable professional practice standards. Policy illustrations will reflect changes to the policyholder dividend scale as soon as practical.

PARTICIPATING ACCOUNT MANAGEMENT POLICY

This Participating Account Management Policy has been established by the Board of Directors, in conjunction with the Participating Policyholder Dividend Policy, and may be amended by the Board from time to time at its discretion. The factors most likely to be considered in deciding whether to amend this policy include changes in applicable legal or regulatory requirements, professional guidelines, industry practices or significant business changes. The Appointed Actuary has overall accountability for the administration of this policy, having regard for relevant corporate policies.

The participating account is managed with regard to the Company's enterprise risk management framework through which the Board and management establish the Company's risk strategy, articulate and monitor adherence to risk appetite and risk limits and identify, measure, manage, monitor and report on risks.

As required by the Insurance Companies Act, the Company maintains accounts for its participating insurance policies separately from those maintained in respect of other policies. This facilitates the measurement of the earnings attributable to the participating account.

The participating account is maintained in respect of participating life insurance policies and small blocks of participating annuities and disability insurance policies that have been issued or assumed by the Company. The participating account is comprised of three main types of sub-accounts. The closed block sub-accounts for Canada Life, New York Life and Crown Life were established for participating insurance policies issued or assumed by the Company prior to demutualization and are comprised of the best-estimate liabilities associated with these policies. The ancillary sub-accounts are comprised of the liabilities associated with provisions for adverse deviation in respect of the policies contained in the closed block sub-accounts. The open sub-accounts for Canada Life and Crown Life were established for participating insurance policies issued or assumed by the Company after demutualization and are comprised of the total liabilities associated with these policies. While the majority of these open sub-accounts have been closed to new business after demutualization, the Canada Life Canadian open sub-account remains open to new business.

The closed block sub-accounts are maintained in accordance with the operating rules established by the Company for the closed blocks and approved by the Office of the Superintendent of Financial Institutions. The closed block operating rules govern the management of the various closed block sub-accounts, including investment income allocation, mortality costs, expense charges and taxes. The Appointed Actuary is required to provide the Superintendent and the relevant non-Canadian insurance regulators with reports and opinions about the operation of the closed block sub-accounts and ongoing compliance with the closed block operating rules as may be required.

Assets of the Company held within its general funds are allocated to the participating account and non-participating account segments for the purpose of determining investment income for each account. Assets are allocated to each segment according to the investment guidelines established for the segments. These guidelines outline criteria for asset mix, liquidity, currency risk and interest rate risk. These guidelines are intended to recognize considerations such as the business objectives, liability characteristics, liquidity requirements, tax considerations and interest rate risk tolerance of each segment. Assets allocated to a segment may from time to time be reallocated to another segment within the same account or another account provided the assets exchanged comply with the investment policy of the respective segments. Any such exchanges are effected at fair value.

On an annual basis the Board of Directors reviews and approves investment policies and guidelines which govern investment activities for each of the sub-accounts. The investment policies outline a number of principles for investing in assets, including risk tolerance and the approach to managing investment risk. Investment risk is managed through underwriting standards, exposure limits and specific guidelines governing asset classes and investment operations. The investment policies establish limits for the concentration of assets in single geographic areas, industries, companies and types of businesses as part of the risk management process. The Company may use derivative products for risk management purposes to hedge asset and liability positions, or as substitutes for cash within specified limits.

For the Canada Life Canadian open, closed block and ancillary sub-accounts, the assets supporting the participating account liabilities are notionally divided into two segments for defining investment needs and objectives and managing the portfolio: (1) investments that are used to satisfy near term policy benefits (next 10 years) and (2) investments that are used to achieve longer term objectives.

The investments used for the near term are primarily fixed income assets. The cashflows of these assets, together with the participating policy premiums are expected to provide for the policyholder benefits for the next 10 years. These benefits include dividends, death benefits, cash surrender values and other policy benefits such as waiver of premium.

The investments used to achieve the longer term objectives include a combination of 1 to 10 year fixed income assets and a diversified pool of common stocks and real estate. As a result, the fixed income assets in this segment are expected to mature and be reinvested several times before satisfying the policy benefits. The focus in managing this segment is to create value by reinvesting in a disciplined manner as investment spreads, interest rate levels and equity market conditions evolve and cycle. The performance of this part of the strategy is a key driver of changes in the dividend scale interest rate and this rate is an important contributor to changes in the dividend scale.

For all other sub-accounts, the Company invests primarily in fixed income assets. The target maturity profile of these fixed income investments is shorter than the expected policy cashflows. This strategy is intended to produce returns that exhibit stability while providing policyholders with some participation in changing fixed income market conditions.

Investment income is allocated to the participating account in accordance with the Company's investment income allocation policy. Generally, investment income results are allocated directly to a segment based on the assets allocated to the segment. Each year the Appointed Actuary reviews the method used for allocating investment income to the participating account and reports to the Board of Directors on its fairness and equitableness.

Expenses and taxes incurred by the Company are allocated to the participating account in accordance with the Company's expense allocation and tax allocation policies.

Expenses are allocated by the area incurring the expense to the appropriate company and line of business. As a general principle, expenses are allocated to a line of business in accordance with its business activities. In addition, from time to time the Company makes significant expenditures/investments outside of regular business activities which may include but are not limited to transactions such as acquisitions, restructurings, and capital expenditures (e.g. major IT systems), the intent and effect of which is to reduce future expenses. The governing principle for fair and equitable treatment of such expenditures/investments is that expenses will be allocated to the lines of business recognizing both the benefit derived by the line of business from that expenditure/investment and the contribution made by the line of business to that expenditure/investment.

For the open sub-accounts, in general, expenses that are exclusively related to participating business are allocated directly to the participating account. Expenses related to both participating and non-participating business are allocated based on business statistics when the expenses vary based on those statistics, based on managers' estimates supported by time studies or other assessments, or in proportion to the total expenses allocated using all of the methods previously mentioned. For unusual items, management will determine and report to the Appointed Actuary the resulting allocation of expenses to each line of business, including the basis and justification for it.

Expenses are charged to the closed block sub-accounts based on pre-determined formulas in accordance with the closed block operating rules.

Taxes are allocated to the participating account using the characteristics of the participating and non-participating accounts that are determinative of the relevant tax costs. In accordance with the closed block operating rules, no taxes on profits are allocated to the closed block sub-accounts since it is expected that closed block earnings will cumulatively be zero over the lifetime of the closed block.

Each year the Appointed Actuary reviews the method used for allocating expenses and taxes to the participating account and reports to the Board of Directors on its fairness and equitableness.

The participating account surplus associated with the open sub-accounts is managed within the Company's capital management framework and with regard to regulatory requirements. Surplus is required for a number of purposes including to help ensure the Company can meet its obligations to participating policyholders, help ensure financial strength and stability of the Company, finance new business growth and acquisitions which may benefit the participating account, provide for transitions during periods of major change, and to avoid undue fluctuations in dividends; subject to items such as practical considerations and limits, legal and regulatory requirements, and industry practices. The surplus position is reviewed annually, having regard for the specific circumstances of the participating account. Based on the review, contributions to surplus may be adjusted by increasing or decreasing the dividend scale.

As permitted by the Insurance Companies Act, the Company may distribute to the shareholders a percentage of the amount distributed to policyholders from the open sub-accounts in respect of a financial year. Prior to any such distribution, the Appointed Actuary will confirm to the Board of Directors that the proposed distribution is permitted under the terms of the Insurance Companies Act. The proportion distributed to the shareholders will not exceed the prescribed amount as determined under section 461 of the Insurance Companies Act. Any distribution made to the shareholders will be published in the Company's annual report.

Under the terms of the closed block operating rules, no distribution to the shareholders may be made from the closed block sub-accounts. In accordance with the demutualization agreement, the amount by which the assets exceed the liabilities in the ancillary sub-accounts is transferred to the shareholders each quarter.

SOURCES OF EARNINGS

The following is provided in accordance with the OSFI guideline requiring Sources of Earnings (SOE) disclosure. SOE is not an International Financial Reporting Standards (IFRS) measure. There is no standard SOE methodology. The calculation of SOE is dependent on, and sensitive to, the methodology, estimates and assumptions used.

SOE identifies various sources of IFRS net earnings. It provides an analysis of the difference between actual net income and expected net income based on assumptions made at the beginning of the reporting period. The terminology used in the discussion of sources of earnings is described below:

Expected Profit on In-Force Business

This component represents the portion of the consolidated net income on business in-force at the start of the reporting period that was expected to be realized based on the achievement of the best-estimate assumptions. It includes releases of provisions for adverse deviations, expected net earnings on deposits, and expected net management fees.

Impact of New Business

This component represents the point-of-sale impact on net income of writing new business during the reporting period. This is the difference between the premium received and the sum of the expenses incurred as a result of the sale and the new liabilities established at the point of sale.

Experience Gains and Losses

This component represents gains and losses that are due to differences between the actual experience during the reporting period and the best-estimate assumptions at the start of the reporting period.

Management Actions and Changes in Assumptions

This component represents the impact on net income resulting from management actions, changes in actuarial assumptions or methodology, changes in margins for adverse deviations, and correction of errors.

Other

This component represents the amounts not included in any other line of the sources of earnings.

Earnings on Surplus

This component represents the earnings on the Company's surplus funds.

Canada Life's sources of earnings are shown below for 2016 and 2015.

Analysis of Results

Expected profit on in-force business is the major driver of earnings and accounted for 67% of pre-tax earnings in 2016. The expected profit on in-force business of \$1,183 in 2016 was \$18 higher than the 2015 level. The improvement year-over-year is primarily due to higher net fee income in Reinsurance and higher expected margins in Individual Insurance, partially offset by lower expected margins in Group Insurance.

The strain on new sales of \$126 in 2016 was \$29 lower than 2015 primarily as a result of higher volumes and sales of annuity business written in the U.K., partially offset by higher strain in Individual Insurance.

Experience gains of \$176 in 2016 were \$11 higher than 2015. The gains in 2016 were primarily due to investment experience in all segments and longevity results in Europe and Reinsurance. These gains were partially offset by mortality results in Reinsurance and expenses in Europe. The gains in 2015 were primarily due to investment experience in Canada and morbidity and longevity results in all segments. These gains were partially offset by expenses in all segments and life mortality results in Europe and Reinsurance.

Management actions and changes in assumptions contributed \$397 to pre-tax earnings in 2016 compared to \$442 in 2015. The most significant contributors in 2016 were updated longevity assumptions, economic assumption updates, updated morbidity assumptions, and modeling refinements, partially offset by expense and tax assumption updates and life mortality assumption updates.

Other of \$(17) in 2016 is primarily due to restructuring and acquisition costs related to Aviva Health and GloHealth.

Pre-tax earnings on surplus decreased by \$12 in 2016 compared to 2015 mainly as a result of lower OCI gains and a property sale in Europe in 2015 which did not repeat, partially offset by higher investment income in Canada.
